MELAG AUTOCLAVES

Fifty years ago, MELAG began in Berlin to specialise in the manufacture of sterilisation equipment. Quality consciousness, reliability, and innovative eagerness, plus the highest in safety standards, have by now made the family-run enterprise MELAG one of the world's leading producers of sterilisation equipment.

The company's success is verified by the sale of more than 400,000 units. Decades of experience, state-of-the-art computer-controlled production technology, the application of high grade materials and an experienced and qualified workforce make MELAG devices easy-to-use quality products.

The company philosophy emphasises the systematic focus on one restricted production program. With its highly specialised development team, it is thereby possible for MELAG to keep and further develop its product line market-driven and on an international leading technical level.

The entire MELAG staff is proud to be making an important contribution to the protection of the health of patients and medical staff with the equipment and accessories it produces for the safe sterilisation and storage of sterilised articles.

DATA STORAGE

CF Card (1071)
All cycle data can be automatically written on the CF card and directly read into any PC.

Melaflash (1067)
The MELAflash system consists of a compact flash card printer, the MELAflash CF card and the MELAflash card reader.

MELACONTROL® (8510)

Process challenge device according EN 867-5 for testing the function of a "Class B" autoclave.

What is MELAcontrol®
MELAcontrol® is a process challenge control and indicator system consisting of a test body, the so-called "helix" and the MELAcontrol® test strips. MELAcontrol® is designed for the simulation of difficult sterilisation conditions, ie of long and narrow-bore instruments that are designated as "Hollow A" in European Standard EN 13060. MELAcontrol® conforms to European Standard EN 867-5: 2001 and is only useful for "Class B" autoclaves.

What does MELAcontrol® offer
MELAcontrol® offers you the possibility, with a minimum of time and expense, of periodically and cost-effectively confirming in your surgery or hospital the performance effectiveness of your "Class B" autoclave. MELAcontrol® simulates the most difficult of all sterilisation conditions: for example, with hollow-body A instruments. Its effectiveness results from its capsule with an indicator strip only at the end of a long, narrow-bore tube. If this process challenge control system has been successfully sterilised – as shown by the change in colour of the MELAcontrol® indicator – then you can assume that the entire charge has been successfully sterilised.

Simple application
The test strip is located in the removable cap of the MELAcontrol® test body, the so-called "helix". When saturated steam acts sufficiently long on the helix, it shows a colour change. A new test strip is used for every test with MELAcontrol®. The items included in delivery of the MELAcontrol® are the test body (helix), and 250 test strips.

MELADEM® 40

Quality assurance for sterilisation

MELAdem® 40 supplies high-quality demineralised water for the steam generation in an autoclave. The MELAdem® 40 can be directly connected to the MELAG Europe autoclaves Vacuklav® and Euroklav® to automatically feed high quality demineralised water for each sterilisation cycle. Of course, you can also use the MELAdem® 40 anywhere else for any application requiring good water quality.

Installation
MELAdem® 40 can be installed directly to a Vacu-klav®, Vacuquick® or Euroklav®. MELAdem® 40 can also be mounted on the wall, or can be simply placed in a sub cabinet. It is attached directly to the tap-water line, and is immediately ready for use after connection to a normal tap-water line.

HILL-ROM® OB-GYN STRETCHER

With its fast and easy patient positioning, Hill-Rom's OB-GYN Stretcher (P8050) is ideal for use in both maternity and emergency

Features:
- 700lbs weight capacity
- Sliding litter enables quick and easy patient positioning
- Stowaway foot section eliminates heavy lifting and storage concerns
- Integrated foot supports save time by eliminating the need to search for stirrups and calf supports
- Integrated catch basin, combined with patient grip handles, offers convenience and saves time
- Next generation steering plus™ system for crisp cornering and control
- Dual-locking four-wheel brakes for a strong, stable platform
- Power washable
- Three year parts warranty and lifetime frame weld warranty

HILL-ROM® ELECTRIC STRETCHER

Combining the comfort of a hospital bed with the mobility of a stretcher

Features:
- 700lbs weight capacity
- Built-in scale shows kilograms and pounds simultaneously
- Low height for safer stretcher ingress and egress
- 5-inch air mattress (Prime Aire ARS® mattress) for patient comfort - the first non-powered air mattress for a stretcher
- Active hand brake – the world's first stretcher hand brake to help you negotiate ramps and corners without using your body weight and for safe and easy stops
- Integrated IV pole transport device helps to manoeuvre stretcher and a portable IV pole with ease
- Next generation Steering PlusTM system for crisp cornering and control
- Dual-locking, four-wheel brakes for a strong, stable platform
- Three year parts warranty and life-time frame weld warranty

SIDHIL INSPIRATION COT

The accepted industry standard for paediatric cots and the only one still produced in volume entirely in the UK. Designed expressly to meet a comprehensive range of paediatric requirements, the Inspiration Cot brings together a range of innovative functions with bright and attractive colourways, which combine to make the cot particularly attractive for the paediatric environment.

Features:
- Colourful and aesthetically pleasing design
- Designed for flexibility; variable height, electrically operated, two-way tilting mattress platform
- Removable head and foot ends allow 360° access when the side rails are down
- Unimpeded access with uniquely designed drop-down telescopic side rails
- Dual sided, linked, tracking and braking system for added safety
- Up to two removable transfusion poles can be fitted
- Includes specially designed visco elastic mattress for maximum comfort
- Lullaby dynamic pressure cradle also available
- Buffers on all four corners and a shelf for linen
- 9003 model features manual CPR and hinge system on head and foot ends to feed cables/leads and tubes into cot
- 3 year warranty (1st year parts & labour, 2nd and 3rd year parts only)
- Maximum user weight when not in tilt: 160kg (25st)
- Maximum user weight when in tilt: 50kg (8st)

CASTING

equipment

OSCIMED CAST SAWS AND EXTRACTION UNITS

The Oscimed 2000 is a very low noise level cast saw with patented anti-noise technology. The Oscimed 2000 consists of a brushless, fanless 100W-24V motor.

It has been ergonomically designed with a modern shape for single handed use. The saw has an instant blade change ability with a patented non-slip lock nut.

Oscimed technology includes saw blades with a noise-suppressing central core.

This vacuum cleaner possesses four levels of filtration (including two filters to HEPA standards) and filters dust down to 3 microns. It has a tough, powerful construction with a support for the saw and vacuum hose. The unit comes complete with an electricity supply socket for the saw. Available in 1-speed version (1000W).

- Sound level: 62dB in speed 1
- Suction: 2200mm water gauge, 50 litres/sec
- Length of vacuum hose: 3 metres
- Capacity of stainless steel tank: 20 litres
- Weight: 12 kg

WELCH ALLYN® DIAGNOSTICS

equipment

WELCH ALLYN® CONNEX® VITAL SIGNS MONITOR 6000 SERIES

The Connex VSM is an advanced, touch screen monitor featuring bright, vivid colours with minimal knobs or buttons for ease of cleaning - perfect for general care floors within the hospital and also for surgery centres and other ambulatory care offices. For hospitals, working with Connex VM software, clinicians can improve workflow by wirelessly sending patient vitals directly to the EMR from the bedside.

- SureBP® technology measures BP as cuff is inflating
- Supports adult, paediatric and neonatal
- Pulse rate and MAP included
- SureTemp Plus thermometry
- Masimo® or Nellcor® pulse oximetry
- Fast recharging lithium-ion battery
- Interval programmes for automatic readings

FOR HOSPITALS

- Get immediate access to accurate patient vitals
- Wireless capability allows data to be sent to the EMR anytime anywhere
- Profiles, controls, alarms, and configures to specific workflows
- Advanced patient ID verifies patient name
- Connects to all leading EHR systems to reduce documentation errors

Multiple models available.

Spot-check vitals   Monitoring   Triage

CABLE MANAGEMENT STAND

The Accessory Cable Management Stand, with its unique accessory storage and cable routing system, is ergonomically designed for ease of use.

This helps keep everything neat and organized, so users can work efficiently and project confidence and professionalism when they interact with patients.

THE FOLLOWING RESPIRATORY MONITORY OPTIONS ARE AVAILABLE

1. ORIDIAN TECHNOLOGY

Surestream incorporates a unique sample technology for enhanced waveform integrity and accuracy that works with Welch Allyn CVSM:

2. MASIMO RESP TECHNOLOGY

Acoustic Respiration Rate (RRa™) is a breakthrough measurement that allows clinicians to noninvasively and continuously assess patients' breathing— facilitating earlier detection of respiratory compromise and patient distress.

3. EARLY SENSE TECHNOLOGY

Optional EarlySense® contact-free respiratory monitoring and motion sensing.

Falls Prevention, Pressure area Prevention and Respiratory Monitoring.

CONNEX® INTEGRATED WALL SYSTEM (CVSM MONITOR WITH THE DIAGNOSTIC SYSTEM)

The Connex Integrated Wall System is an advanced vitals management and physical assessment solution that has everything a busy department needs to quickly exam the patient and make decisions based on accurate, complete information.

- Fast 15-second NIBP and pulse rate
- SureTemp Plus and/or Braun ThermoScan® PRO 4000 ear thermometry
- Masimo® or Nellcor® pulse oximetry
- Adult, pediatric, and neonatal blood pressure modes
- NIBP interval monitoring mode, including customizable interval programs
- Programmable visual and audible alarms for BP, SpO2, temperature and pulse
- Integrated 3.5 V handles for physical assessment tools
- Can be electronically sent directly to the EMR/EHR system

WELCH ALLYN® SPOT VITAL SIGNS® LXI

- SureBP measures blood pressure in about 15 seconds as the cuff is inflating - resulting in time savings for you and improved comfort for your patients. Pulse rate and MAP included
- Braun ThermoScan® PRO 4000 ear thermometer
- Nellcor® or Masimo® pulse oximetry
- Ability to manually enter weight, height, respiration rate, and pain level calculates body mass index
- 50-reading memory allows retrieval of previous data for review or to download later
- Bigger, brighter LCD display provides greater visibility from farther distances

WELCH ALLYN®
SPOT VITAL SIGNS®

• Take vital signs in seconds with hospital-grade technology that spot checks vital signs easily, accurately and affordably

• Automated measurement of non-invasive blood pressure (NIBP), pulse rate, temperature and pulse oximetry in 30 seconds

• Lightweight and portable with a variety of mounting options

• All configurations include NIBP, Pulse Rate and mean arterial pressure (MAP)

• Optional—SureTemp® Thermometry, Nellcor® or Masimo® pulse oximetry

WELCH ALLYN®
CONNEX® PROBP™ 3400

Puts consistent, accurate blood pressure readings at everyone's fingertips

• Small, handheld design makes device easy to carry and capture readings on rounds or in triage settings

• The option of choosing SureBP™ technology that enables fast, accurate 15-second blood pressure readings, improving patient comfort

• Obtains accurate readings and minimises error codes, even in the presence of many cases of motion or weak pulse

• Bluetooth® wireless and USB-wired technology enables connectivity to select EMR/HIS systems, improving documentation accuracy and efficiency

SureBP = SureBP® technology measures blood pressure in about 15 seconds as the cuff is inflating — resulting in time savings for you and improved comfort for your patients, pulse rate and MAP included.

Standard BP = Takes the BP as the cuff deflates as a traditional sphyg or monitor does.

*Neonatal cuffs do not have FlexiPort™ technology

ARE YOU TAKING AN ACCURATE BLOOD PRESSURE?

Step 1 - Choose the right equipment:
A blood pressure measurement instrument that has been calibrated for measurement accuracy annually. Welch Allyn has revolutionised Manual Blood Pressure design by creating gear free technology that has fewer moving parts – stays accurate longer. Enables blood pressure gauges to withstand drops of up to 1.5 meters and still maintain calibration. Most of the Welch Allyn Automated BP products use SureBP technology that enables fast, accurate 15-second blood pressure readings, improving patient comfort. Obtains accurate readings and minimises error codes, even in the presence of many cases of motion or weak pulse.

Step 2 - Prepare the patient:
Make sure the patient is relaxed by allowing 5 minutes to relax before the first reading. The patient should sit upright with their upper arm positioned so it is level with their heart and feet flat on the floor. Remove excess clothing that might interfere with the bp cuff or constrict blood flow in the arm. Be sure you and the patient refrain from talking during the reading.

Step 3 - Choose the proper BP cuff size:
Welch Allyn have a large range of cuffs.

The size is correct when the artery indicator is within the size range marked on the cuff

The Welch Allyn BP Cuffs have a 3 year warranty and are all Latex Free. They will fit all of your blood pressure devices. The Flexiport cuffs allow you to use one cuff in virtually every room and on virtually every device you have.

Benefits:
• Minimize the risk of cross-contamination and control infections - the cuffs have an anti–microbial coating and are easy to clean
• Eliminate confusion caused by multiple tube and connector configurations
• FlexiPort cuffs meet the AAMI and AHA specifications
• Long cuffs are designed to allow practitioners to take blood pressure readings on patients who have short and stocky arms. Size 11L and 12L
• Tubing can rotate 360 degrees to stop pressure on patients arm

equipment

YOU CAN CHANGE SIZES AT THE CUFF

Means not worrying about connectors missing

BE AWARE!!!

THE FOLLOWING ACTIVITIES AFFECT A BLOOD PRESSURE READING:

ACTIVITY	SYSTOLIC (MMHG)	
Cuff Too Small	10 TO 40	↑

Large Adult (12)	32-43 cm	40-SOFT-12	

ECO CUFF

FlexiPort® EcoCuff™ Single Patient Use Blood Pressure Cuff

One true solution to help facilities reduce cost, cross-contamination, and environmental impact.

New technology that provides an optimized single patient use solution which maximizes value while minimizing cross-contamination related to BP cuffs. Single-point connection facilitates a simple standardization solution. Uniquely designed for and marked as single patient use. Designed to last an entire patient stay – Tested to 100 on/offs and BP cycles.

- Eco Cuff is available in a 'raw' format only (no tubes or connectors) – Reduces waste and cost.
- Eco Cuff are not wrapped individually – Reduces waste
- Eco Cuff is 100% Polypropylene – Capable of being Recycled (#5), reducing environmental impact
- Eco Cuff features a unique slot fitting system – Helps prevent miscuffing
- Eco Cuff meets all the latest clinical guidelines for proper fit from AAMI and AHA

Sizes
- ECO-09 EcoCuff, Child, 15-21 cm
- ECO-10 EcoCuff, Small Adult, 20-28 cm
- ECO-11 EcoCuff, Adult, 27-38 cm
- ECO-12 EcoCuff, Large Adult, 33-45 cm

TYCOS® 767-SERIES WALL AND MOBILE ANEROIDS

Great looks and clinical-grade accuracy make the 767-Series one of the best Tycos aneroids ever.

- Laser-engraved dial face provides unmatched accuracy
- Recessed dial face and high contrast red pointer increase visability and reduce parallax errors
- Lifetime calibration warranty
- New 5-leg stand provides improved stability and manoeuvrability
- Simple colour changes give the aneroid a new look
- Latex and mercury free

WELCH ALLYN® DURASHOCK™ MODEL DS55 HAND ANEROID

The DS55 provides a traditional thumbscrew-style air release valve and identification labels that can be customised. The DS55 is available in four colour schemes – blue, yellow, red and black.

- Laser-engraved dial for accuracy
- Shock resistant for accuracy and lower cost over time
- 10-year calibration warranty
- Premium aesthetics

WELCH ALLYN® DURASHOCK™ MODEL DS45 - INTEGRATED ANEROID

- The first gear-free, shock-resistant aneroid sphygmomanometer with integrated cuff
- Meets AAMI shock-resistant standard for enhanced durability
- Laser-engraved dial face for accuracy
- Gauge rotates 360° for easy viewing and snaps directly into cuff for quick cuff change
- Lightweight and latex-free for safety
- Durable one-piece cuff
- 10-year warranty

Triple-leaf binaural spring encased in polyurethane allows size adjustment while preventing breakage
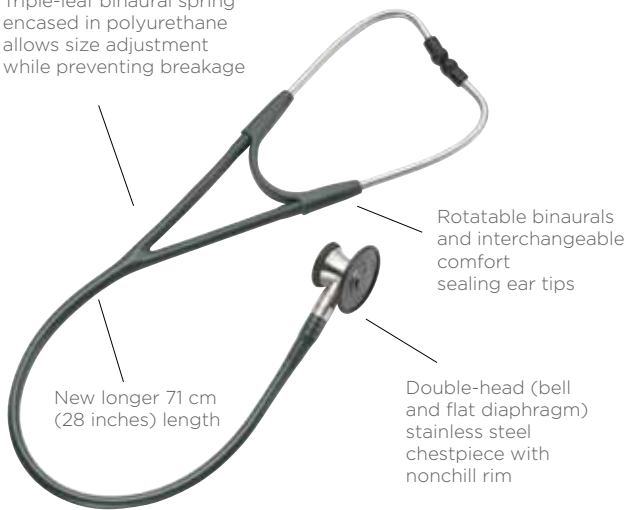

Rotatable binaurals and interchangeable comfort sealing ear tips

New longer 71 cm (28 inches) length

Double-head (bell and flat diaphragm) stainless steel chestpiece with nonchill rim

HARVEY™ ELITE® STETHOSCOPE

The Harvey Elite offers updated styling with the superior comfort and auscultation capabilities cardiologists have come to rely on. Its stainless steel head transmits sounds crisply and clearly. The Harvey Elite comes with a 10-year warranty and a pediatric chestpiece.

5079-232 Accessory Kit

(Includes one pediatric chest piece, one flat diaphragm, one corrugated diaphragm, one pair soft eartips, one pair hard eartips)

What is the advantage of a two-tube stethoscope?
Two-tube stethoscopes, such as the Harvey DLX and Elite, provide an individual sound channel to each ear. This allows you to hear the subtle characteristics of heart sounds and murmurs more distinctly. The heavier tubing also filters out the distracting noise typical of a busy environment. Welch Allyn Harvey stethoscopes have both a bell and diaphragm to easily isolate high-(diaphragm) and low-frequency (bell) sounds. Some stethoscopes have only a diaphragm. Harvey stethoscopes have adjustable binaurals for a customized, comfortable fit.

equipment

PROFESSIONAL DIAGNOSIS STETHOSCOPE

Excellent acoustic clarity and durability

Welch Allyn General Diagnosis stethoscopes provide excellent sound quality, durability, and comfort for the practicing professional. Their acoustics allow for accurate auscultation of cardiac, pulmonary, and vascular sounds.

Excellent for general auscultation and blood pressure

- Double-head design
- Adult and Pediatric versions available
- Stainless steel chestpiece and binaurals
- Rotatable binaurals and interchangeable comfort sealing eartips
- Latex free
- 5-year warranty

GENERAL EXAM STETHOSCOPE

- General-use stethoscope
- Lightweight chestpieces with nonchill rims
- Adjustable chrome-plated binaurals
- Latex-free, flexible, single-channel tubing
- Two-year warranty

TURN YOUR PANOPTIC INTO A CAMERA

The new Welch Allyn iExaminer turns the PanOptic Ophthalmoscope into a mobile digital imaging device allowing you to view and take pictures of the eye like you've never done before. The adapter aligns the optical access of the PanOptic Ophthalmoscope to the visual axis of the iPhone 4 or 4S camera to capture high resolution (5/ 8 megapixel*) pictures of the fundus and retinal nerve.

Panoptic

+

iExaminer Adapter & iExaminer App

= Photo's of the eye

3.5V PANOPTIC™ OPHTHALMOSCOPE HEAD

The revolutionary PanOptic™ provides easier entry into the eye, together with a dramatically wider field of view to more easily evaluate head trauma, papilledema and retinal haemorrhage.

• 5x larger view of the fundus vs standard scopes in an undilated eye

• 25º field of view vs the standard 5º field of view

• Greater working distance improves comfort for both practitioner and patient

• Detect corneal abrasions with cobalt blue filter and corneal viewing lens

• Compatible with all existing Welch Allyn 3.5v power sources

• Free diagnostic wall chart available

3.5V STANDARD COAXIAL OPHTHALMOSCOPE HEAD

• Halogen HPX™ lamp provides 30% whiter, brighter light for true tissue colour and long-lasting performance

• Detect corneal abrasions and foreign bodies with cobalt blue filter

• Coaxial optical system produces shadow-free spot viewing

• Polarising filter virtually eliminates corneal reflection

• Sealed optics keep out dust and dirt

3.5V DIAGNOSTIC OTOSCOPE HEAD

- Halogen HPX Lamp provides 30% more light output for true tissue colour and long-lasting performance
- Fibre optics project cool light to the distal tip with no reflections or obstructions, for clear viewing of the tympanic membrane
- Sealed system allows for pneumatic otoscopy and accurate diagnosis of otitis media

3.5V MACROVIEW™ OTOSCOPE

The MacroView™ Otoscope offers a significant advance in hand-held otoscopy, providing the practitioner with an improved view for enhanced decision making.

- Enables nearly a full view of the tympanic membrane with 30% more magnification
- Focusable eyepiece
- Tip grip for more secure speculum attachment
- Halogen HPX™ lamp provides 30% more light output for true tissue colour and long-lasting performance
- Fibre optics project cool light to the distal tip with no reflections or obstructions, for clear viewing of the tympanic membrane
- Sealed system allows for pneumatic otoscopy and accurate diagnosis of otitis media
- Simply detach the head for high-intensity

POCKETSCOPE™ OTOSCOPE WITH THROAT ILLUMINATOR

Small, convenient, and easy to use with bright, white halogen light and a built-in throat illuminator.

- Halogen light for true tissue colour and consistent, long-lasting illumination
- Simply detach the otoscope head to use the throat illuminator or all-purpose penlight
- Fiber optics provide cool light with no reflections or obstructions
- Wide-angle viewing lens allows for instrumentation under magnification
- Sealed system for pneumatic otoscopy

POCKETSCOPE™ OPHTHALMOSCOPE

Lightweight, compact diagnostic instruments deliver high performance in a slightly smaller package.

- Halogen light for true tissue colour and consistent, long-lasting illumination
- 12 aperture/filter combinations for greater versatility: micro, small, and large spot sizes, cobalt blue filter for corneal exams, fixation target, and slit aperture, plus red-free filter and unfiltered halogen
- 48 focusing lenses for better resolution

SOLID STATE PROCEDURE LED HEADLIGHT

Targeted, well-defined illumination without the heat of traditional headlights.

- Weighs just 170 grams - extremely comfortable to wear for both simple and complex procedures
- Supplies bright, white, shadow-free light for true tissue colour
- Optional rechargeable battery pack makes this a completely portable, compact unit that allows the user freedom of movement

SOLID STATE PORTABLE LED HEADLIGHT

Provides illumination precisely where it is needed, with cool, bright light that ensures comfort for both clinician and patient.

- Weighs just 113 grams - one of the most comfortable and lightweight headlights available
- Fits inside a shirt pocket and allows the user complete freedom of movement
- Supplies bright, white, shadow-free light for true tissue colour

LED VAGINAL SPECULA ILLUMINATION SYSTEM

Superior visualisation - advanced LED light source provides better visualisation of the exam area by supplying brighter, whiter light, right where it is needed.

- Cordless and rechargeable - no cord to get in the way or break during procedures, continuous on time of 80 minutes, recharge time of six hours, lithium-ion battery technology
- Automatic on/off - no more hassle with turning the unit on and off. When the new KleenSpec® Illumination System is inserted into the 590 Vaginal Speculum it is automatically

VAGINAL SPECULA OLDER ILLUMINATION SYSTEM

Conduct exams more completely and confidently with a vaginal specula that transmits brighter, whiter halogen lighting to the speculum tip and directly onto the cervix.

- Moulded-in light carrier projects halogen lighting to the speculum tip and directly onto the cervix for clearer viewing and diagnosis
- Illumination system includes 6v halogen light handle, on/off switch, and transformer
- One-handed angulation and elevation provides multiple settings with positive-locking positions for easy operation

GS EXAM LIGHT IV

The GS Exam Light IV features:

- A single LED that provides whiter, brighter light than halogen, so you see truer tissue colour rendition during an exam
- Less energy consumption for reduced cost of ownership
- No bulb replacement for cost savings
- A compact, unobtrusive head ensuring pinpoint accuracy
- Minimal heat dissipation
- Touchless on/off
- 5 year limited warranty

GS900 PROCEDURE LIGHT

Six 5,500° K LEDs that provide a whiter, brighter light than halogen.

- Less energy consumption for reduced cost of ownership
- No bulb replacement for cost savings
- Combines outstanding durability, extraordinary manouverability, unparalleled spot quality and multiple mounting options
- Dimming feature
- Minimal heat dissipation and high colour temperature
- 5 year limited warranty

WELCH ALLYN'S FLEXIBLE FAMILY OF CARDIOPULMONARY PRODUCTS YOU CAN ATTACH TO YOUR PATIENT NOTES

CP150

PC SPIROMETERY

ABPM

CP50 PLUS

PC ECG

CARDIO PERFECT WORKSTATION CENTRAL DATABASE ALL TESTS IN ONE LOCATION AND THEN ATTACH TO PATIENT NOTES
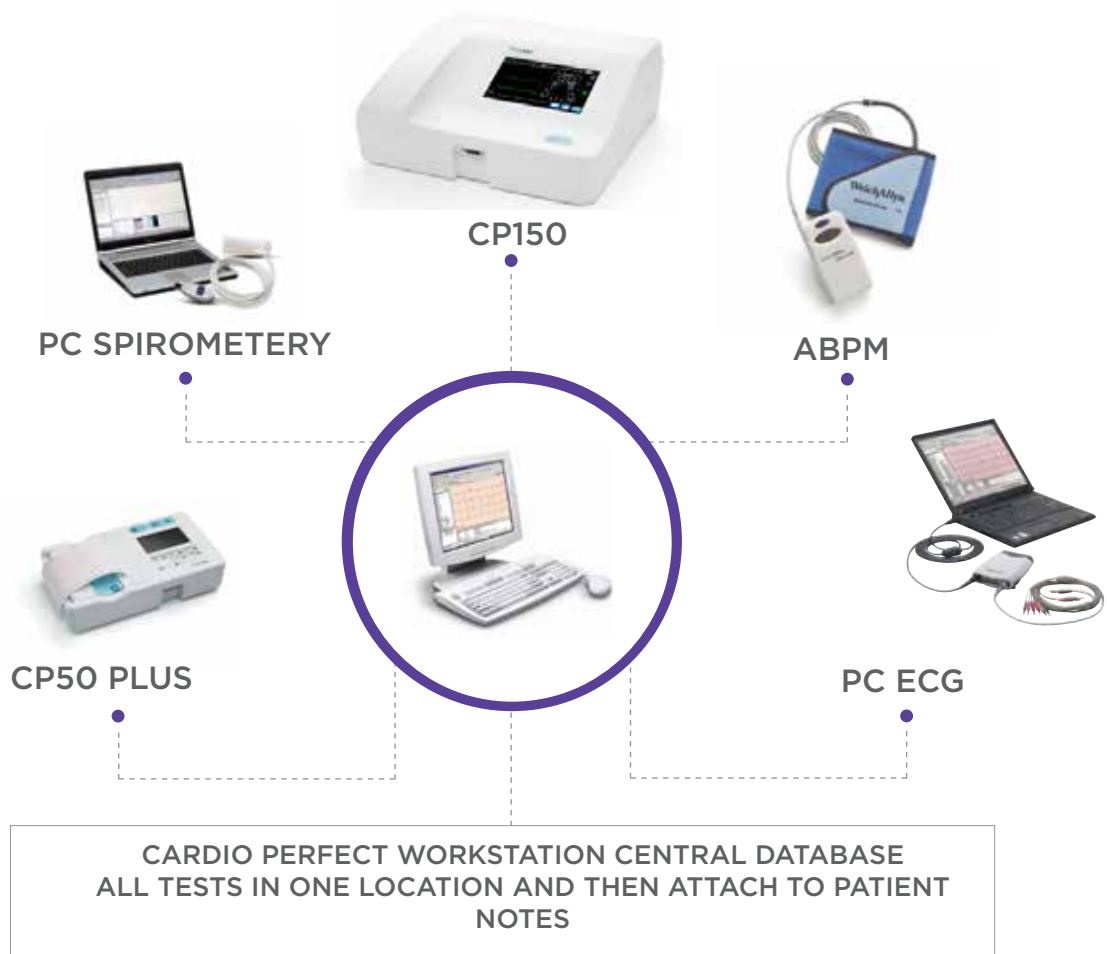

CP50 PLUS
- Simple, 12 lead multichannel ECG, interpretive, colour touch screen display and 4" thermal printer also external printing capability

CP150
- The Welch Allyn CP 150™ Electrocardiograph (ECG) offers simplicity with speed using a unique, 7" touch-screen display and keyboard — helping to improve accuracy. To meet the needs of fast-paced environments, take quick ECG readings with the touch of a button

PC SPIROMETERY
- Fast, reliable pre-/postbronchodilator FVC, SVC, and MVV testing with automatic interpretation and reversibility analysis
- Instantly verify quality and variability of test performance and compare previous tests using the trending tool

ABPM
- Accurate 24-hour ABPM ambulatory blood pressure monitoring with simple, one-button operation
- Oscilometric technology allows for easy patient hook-up
- Lightweight compact and quiet for improved patient compliance
- Dynamic inflation automatically limits maximum cuff pressure for patient comfort
- 100% latex-free cuffs reduce risk of allergic reactions
- New sleeve cuffs are machine washable due to removable bladder

PC ECG
12 lead resting ECG system including:
- Cardio Perfect Workstation software, digital ECG patient cable with USB connection, software for resting ECG

equipment

CP50™

Get the power of a fully-featured ECG in a compact, affordable, easy-to-use package with the new Welch Allyn® CP50™ electrocardiograph. With simple one-button operation the CP50™ makes performing ECG tests easy for trained caregivers of all skill levels.

And with advanced features like a full-colour, touch-screen display, high-resolution thermal printer, and a full range of EMR connectivity options, the CP50™ gives you the options your practice needs at a price that fits your budget.

CP50™ standard features
- Reliable colour touchscreen display
- On-screen instructions that guide you through a test
- Programmable report formats
- High-resolution thermal printer
- Optional mobile stand and carrying case

CP50™ Plus with connectivity features

All features of the CP50™, plus:
- Connects to the CardioPerfect™ Workstation for paperless efficiency with full suite of Welch Allyn® cardiopulmonary devices
- Flexible connectivity options: EHR, HIS, email, web, telemedicine
- External printer integration
- Programmable patient entry fields

CP150™

The Welch Allyn CP 150™ Electrocardiograph (ECG) offers simplicity with speed using a unique, 7" touch-screen display and keyboard — helping to improve accuracy. To meet the needs of fast-paced environments take quick ECG readings with the touch of a button.

- 7" Color, touch screen display for fast and easy entry of accurate patient information
- Instant-on feature powers the device up quickly and lets you take an ECG at a moment's notice
- Advanced filters for optimal ECG trace quality ensure accurate readings
- Three (3) lead ECG preview
- Battery operation lets you easily transport your device to the patient
- Store up to 100 test results on the device or transfer to a USB memory stick
- A4 Printout

PC-BASED RESTING ECG
FULLY INTERPRETIVE

Turns any PC into a full-featured electrocardiograph. Intuitive Windows® operation makes it easy for your staff to learn and use, while the power and features of a PC-based system save money and increase utilisation of existing equipment.

- Large screen display saves time and eliminates repeat ECGs
- ECG measurements speed physician review and interpretation
- Programmable report formats that print on plain paper using inkjet or laser printer
- On-screen ECG report editor lets you change or add a diagnosis
- Serial comparison lets you compare previous ECGs to highlight changes
- Upgradable - leverage your investment by adding spirometry and/or ABPM modules to complete your cardiopulmonary suite

PC-BASED SPIROPERFECT™ SPIROMETER

See and compare accurate results from pulmonary function tests in seconds. Clearly evaluate pulmonary obstruction or restriction, increase success rates for patients who are undergoing smoking cessation, show progress, and help paediatric patients comply with test procedures.

- Fast, reliable pre-/postbronchodilator FVC, SVC and MVV testing with automatic interpretation and reversibility analysis
- Instantly verify quality and variability of test performance and compare previous tests using the trending tool
- Motivate children with incentive graphic
- Reduce risk of cross contamination with single-use disposable transducers
- Easily monitor, review, store and print on your computer with Welch Allyn® CardioPerfect™ workstation software
- Interface with EMR or patient management systems for onsite or offsite review of key data

LED UPGRADES

New patented technology with the familiarity of halogen and the performance benefits of LEDs. Four lamp upgrade kits cover a broad range of physical assessment instruments you use every day. Lamp bases are date-stamped for easy warranty verification. Kits include a lamp removal tool for easier replacement.

Long life
• Tested to 30X Halogen lamps
• Guaranteed 7 years

High performance
• Consistent colour output through dimming cycle
• Patented circuitry and colour rendering for specific clinical applications

Energy efficient
• 3x the on-time with Welch Allyn® rechargeable handles
• Lower operating temperature intended for greater patient/clinician comfort

30X Longer Life
• Tested to 30X halogen lamps
• Guaranteed 7 years

MICROTYMP® 3 - PORTABLE TYMPANOMETRIC INSTRUMENT

One of the fastest, easiest and most complete portable tympanometric instruments. Provides objective information for the diagnosis of otitis media

- Features 1,000 Hz quick-interpretation mode for testing infants under the age of 6 months
- Test in seconds—ideal for young or uncooperative patients
- Convenient cards and sleeve attach to charging base for easy documentation of 1,000 Hz results
- Foreground and background contrast LCD screen for easy viewing
- Three optional forms of information available for 226 Hz—tympanogram, numerical and interpretive data—making it flexible for your needs
- Compare middle ear function measurements side-by-side with easy-to-use graphs (226 Hz only)
- Tests print automatically or on-demand and can produce multiple copies for parent consultation or referral (for 226 Hz only—printing not available for 1,000 Hz)

HUNTLEIGH CTG MONITORS

Sonicaid fetal monitors

The Huntleigh Sonicaid™ range of fetal monitors delivers innovative world-class obstetric solutions for midwives and obstetricians. Our extensive range allows monitoring throughout pregnancy in all environments.

Our success in fetal monitoring is born from more than 40 years' experience and whilst recognised as a major supplier of CTGs worldwide, we are continuously investing in new and improved solutions to meet the changing demands of our customers.

The range is complemented by our software systems which include maternity information, labour management and central review and archiving to satisfy all your hospital requirements.

FOR MORE INFORMATION CONTACT:
USL MEDICAL CUSTOMER SERVICES ON 0800 658 814

HUNTLEIGH SONICAID BD4000XS

Entry level monitoring

The BD4000xs series fetal monitors provide solutions for all areas of fetal monitoring. Using state of the art digital signal processing technology with enhanced FHR performance. The range includes antenatal and intrapartum models with a range of options and interface capabilities. This provides the most cost effective and flexible solution for all your fetal monitoring needs. Its compact size and styling belie its ruggedness and robust design, using the same materials, construction and design expertise as our world-renowned handheld dopplers.

Features:

- Twins capability as standard
- Unique no compromise full size twin FHR scale printing
- User adjustable, tachycardia, bradycardia, loss of contact and cross–channel rate verification alerts
- Hospital Information System and Vital Signs Monitor interface
- User-customisable trace annotation facility
- Automatic fetal movement detection
- Intuitive user interface and controls simplifying training
- Maternally sensed fetal movement marker
- FECG and IUP upgrade options

HUNTLEIGH SONICAID TEAM SERIES

Advanced fetal monitoring with CTG analysis

The Sonicaid Team range is designed for simplicity in fetal monitoring. Developed in collaboration with leading obstetric specialists, the small, easy to use and lightweight unit can be transported effortlessly - within hospitals, to clinics, doctors' offices or even to the home.

Features:

- Twin fetal heart rate scales provide the clearest differentiation between two heart rates and avoids the difficulty of interpreting offset or overlapping traces
- Obstetric management interface as standard
- Scrolling display of fetal heart rate and uterine activity traces
- Six hours of trace storage
- Records can be annotated at the touch of a button
- Maternally sensed and automatic (Actogram) fetal movement detection
- Tachycardia, bradycardia, signal loss and cross-channel rate verification alarms
- Twins (TeamCare Duo) and Intrapartum (Team IP) variants
- Care Antepartum CTG analysis provides an objective, numerical and consistent assessment of the CTG. Clinicians can rely on a large database of collective experience to support their own visual assessment
- Trend provides clear periodic changes over time in the FHR. For use during the first stage of labour, clinicians are quickly highlighted to changes in the variation, basal heart rate and deceleration size

HUNTLEIGH SONICAID FM800 ENCORE SERIES

High performance acute fetal/maternal intrapartum monitoring

The Sonicaid FM800 Encore is a high performance fetal and maternal monitor, using today's most advanced technology to produce the most accurate acquisition of data for clinician decision support. Whether you need standard fetal monitoring or equipment for specialist, high-risk care, the Sonicaid FM800 Encore series gives you accuracy and clarity in every situation.

In the fast-paced environment of the labour ward, you need equipment that's easy to use and data that is quick to read. The Sonicaid FM800 Encore gives you comprehensive fetal/maternal monitoring and analysis in one technologically advanced yet simple to use monitor.

- Using the very latest in ultrasound technology, the Sonicaid FM800 Encore gives increased performance. The wider, deeper, uniquely designed ultrasound beam shape makes it easy to locate and maintain contact with the fetal heart in mothers of all sizes
- Superbly accurate fetal ECG that works in the most demanding of environments – perfect for the busy labour room
- User defined alarm settings are held in memory for each new recording
- Unique Intelligent Fetal Analysis (IFA), providing fetal data analysis to support professional assessments
- Care Antepartum CTG analysis provides an objective, numerical and consistent assessment of the CTG. Clinicians can rely on a large database of collective experience to support their own visual assessment
- Trend intrapartum analysis provides clear periodic changes over time in the FHR. For use during the

equipment

D900 VASCULAR DOPPLER

*Non-directional doppler

The Dopplex® D900 is a low cost audio only, non-directional doppler, principally used for ABPI measurements by community nurses and doctors in their role of leg ulcer management.

- Clear audio sounds of blood flow or fetal heart
- Enhanced battery management
- Compatible with the complete range of vascular probes. When used with EZ8 probe it is excellent for the infrequent user in locating brachial and pedal arteries
- Large carry bag and headphones included

*Probe sold separately

MD2 VASCULAR DOPPLER

*Bi-directional doppler

The Dopplex® MD2 is one of the most advanced pocket dopplers on the market. It provides the ability for high level vascular assessment, and is ideal for the detection of peripheral arterial disease. When used with the high sensitivity vascular probes it provides quality bi-directional blood flow information. It can be linked to the Dopplex® Reporter software package for high quality waveform reports or the Dopplex® Printa for single waveform recordings.

- Connects with all high sensitivity probes (2, 3, 4, 5, 8, 10 MHz)
- Provides bi-directional blood flow information and documentation
- Integral battery management
- Enhanced audio output
- Large carry bag will hold sphyg and cuffs

*Probe sold separately

SD2 VASCULAR DOPPLER

*Bi-directional doppler

The Dopplex® SD2 provides bi-directional vascular information to the vascular professional including the display of flow direction. It is ideal for clinical specialists wishing to conduct advanced doppler studies.

• Compatible with all high sensitivity vascular probes (audio only with OP2 and OP3)
• Ideal for ABPI assessment
• Provides bi-directional blood flow information
• Enhanced stereo audio output
• Large carry bag
• Stereo headphones included

*Probe sold separately

DFK

Diabetic Foot Assessment Kit

The Diabetic Foot Assessment Kit provides the professional vascular or diabetes specialist with a system to help in the assessment of neuropathy, ankle brachial pressure index (ABPI) and toe brachial pressure index (TBPI).

• Bi-directional doppler (MD2) and probe (VP8HS)
• Neuropen (includes 10g monofilament)
• Trigger operated sphyg with a range of latex free cuffs (arm/ankle, large and small toe)
• Educational DVD
• Hard carry case
• Set of guides (ABPI/TBPI)
• Headphones
• Box of Neuropen tips

HUNTLEIGH DOPPLER ACCESSORIES

High sensitivity doppler probes

Based on over 20 years' experience in this field, the latest generation of the world renowned Dopplex® hand-held doppler range offers even greater performance, quality and value for money.

The range now has significantly enhanced features including:

- Improved probe design with 50% greater efficiency to give increased sensitivity for easier detection of smaller vessels and calcified arteries
- An EZ8 wide beam probe for easy vessel location
- A reusable intraoperative probe for cost effective reassurance during surgery
- Improved, audio performance, battery power management, carry bag design which includes space for a sphyg and cuff

EZ8 PROBE: The new 8MHz high sensitivity EZ8 doppler probe incorporates Wide Beam technology to allow easy location of the vessel. It is also easier to maintain vessel contact during inflation and deflation.

VP4HS: The 4MHz high sensitivity doppler probe for detection of deep lying vessels.

VP5HS: The 5MHz high sensitivity doppler probe for edematous limbs and deep lying vessels. The ideal probe as an adjunct to the EZ8 for ABI measurements.

VP8HS: The 8MHz high sensitivity doppler probe for easier detection of peripheral vessels and calcified arteries.

VP10HS: The 10MHz high sensitivity doppler probe for detecting smaller vessels in superficial applications.

IPP3: The 8MHz Resterilizable Intraoperative probe. Ideal for most surgical applications.

D920 FETAL DOPPLER

Audio only doppler

This audio doppler has been designed with ease of use in mind. Its high sensitivity transducer coupled with clear fetal heart sounds, enable the clinician to quickly locate the fetal heart.

- High sensitivity ultrasound for improved ease of use
- 2MHz waterproof transducer suitable for use in a water birthing environment
- Battery low indicator
- Easy clean transducer for improved infection control
- Belt clip and neck-cord (option) to aid handling

FD1 FETAL DOPPLER

Waterproof rate display doppler

The FD1 is a highly versatile obstetric doppler, with the added advantage of displaying the fetal heart rate. The high performance transducer enables reliable detection from early gestation right through to delivery, even on obese patients.

- Advanced real time auto-correlation fetal heart rate processing
- Active noise reduction for crystal clear fetal heart sounds
- 2MHz waterproof transducer suitable for use in a water birthing environment
- Advanced power management with auto switch-off to conserve battery life
- Long robust coiled cable enables optimum transducer position in all circumstances

POLE STAND ACCESSORY

A convenient way of holding your hand-held doppler and preventing it from disappearing into other departments.

- Options for both hand-held and desktop dopplers
- Provides convenient and height adjustable secure mount on mobile 5 wheel base
- Includes basket for storing gel, probes, cuffs, etc
- Option to mount Dopplex® Printa II on pole below doppler

HUNTLEIGH ABILITY

Integral easy grip handle

Integrated thermal printer (can be used with paper or label rolls)

Clear display showing test status, numerical results, waveform and interpretation.

Simple user interface.

Colour coded, easy connect tubing.
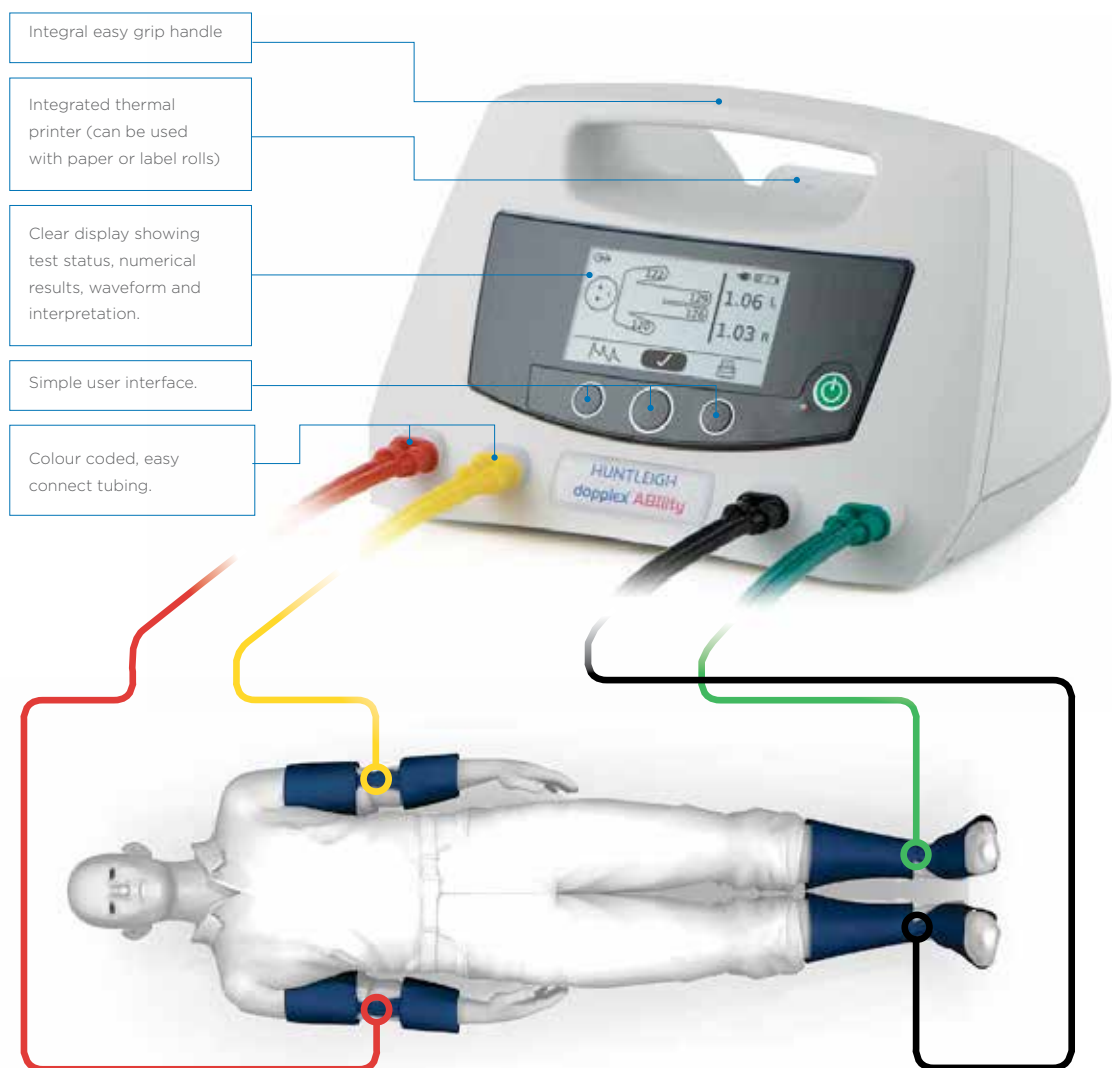

AUTOMATIC ANKLE BRACHIAL INDEX SYSTEM

Revolutionising Ankle Brachial Pressure Index Measurements

Ankle Brachial Index System has never been simpler or quicker. It's portability enables measurements to be made more efficiently in the primary care clinic, hospital or patient's home. This can lead to the prioritisation of clinical services by improving clinical pathways.

ABIs are calculated easily and accurately in three minutes without the need to rest the patient. Results are automatically calculated, interpreted and displayed with Pulse Volume waveforms on the LCD panel. The test results can be printed on either thermal paper or adhesive backed label paper via the integral printer.

EAGLE FIXED AND MOBILE SHELVING

equipment

EAGLE STORAGE SOLUTIONS

Eagle provides a vast range of storage solutions designed around maximising space, improving ergonomics, processes and work flows. In healthcare environments today, storage space is often at a premium. It is not uncommon to out grow storage areas due to increased clinical workload. Eagle's shelving can provide solutions for any new rebuild, taking into consideration the needs of today, while allowing the flexibility for change and growth in the future.

Our solutions can be tailored for any clinical area including:

- Theatre
- Sterile supply services
- Wards
- Linen departments

Solutions include:

High density storage solutions
- Floor track solutions: running on bearings and only protruding 1 cm from the floor, this new product from Eagle offers many benefits

These include:
- No fixed ends increasing the number of available pick faces
- The ability to store up to 900kg on one mobile unit
- Provides optimal storage when there is minimal space available
- Ergonomically friendly and easy to manoeuvre mobile units
- Overhead track storage solutions: offering similar benefits to the floor track system, the overhead solution has fixed ends with mobile units that run on castors. Each mobile unit can store up to 450kg

Shelving
Available in a wide range of sizes and finishes, USL will be able to provide a suitable product for any clinical area or requirement. Finishes include stainless steel, zinc, chrome and expozay finishes.

Wire carts
Mobile shelving solutions designed around reducing double handling and improving work and process flows.

FOR MORE INFORMATION CONTACT:
USL MEDICAL CUSTOMER SERVICES ON 0800 658 814

Accessories
A range of various accessories are available to help utilise storage space. These include:

- Tote bins
- Shelf dividers
- Shelf ledges
- Storage baskets
- Cart covers

Contact your USL Representative for a free measure and quote or for advice on how to best utilise your storage space.

Case Carts
Available in a range of sizes with adjustable shelving heights.

MEDICAL & SURGICAL CARTS/TROLLEYS

equipment

HERMAN MILLER MEDICAL AND SURGICAL PROCEDURE CARTS

Herman Miller provides a wide range of carts for every clinical need. These include:

- Anaesthetic carts
- Resuscitation carts
- Airway carts
- Procedure carts
- Medication trolleys
- Linen carts
- Catheter carts
- Laptop trolleys
- Endoscopy carts

Herman Miller carts are designed to fit in with, or improve the processes and tasks that we complete every day. When choosing a cart solution we take into consideration work processes, function, storage and transport flow. Solutions are focused on:

Standardisation
Ensuring in an area where multiple carts are used, that the carts are all configured identically so staff have complete familiarity in emergency and day to day situations.

Flexibility
Over time, processes and products change. These changes can affect the suitability of a custom made product. All Herman Miller carts allow for their configuration to be changed, meeting the needs of the day.

Functionality and modularity
Drawers and accessories are all interchangeable. Create the function you need with a combination of specific interior components. Recreate new styles or functionality by exchanging components.

Durability
All of the carts are made of highly durable impact-resistant plastic. Colour is integrated into the plastic so there is no colour chipping even if surfaces are scratched. The carts are put through rigorous tests to ensure they meet the needs of a fast paced hospital environment. This includes tipping them, pushing them into walls at high speed, loading them to capacity and ensuring drawers won't fall out.

FOR MORE INFORMATION CONTACT:
USL MEDICAL CUSTOMER SERVICES ON 0800 658 814

Value
Herman Miller carts are guaranteed for 10 years… that's 87,600 hours of constant use…and then some.
Mobile technology laptop carts are guaranteed for 5 years.

Cart design
There are many factors to consider when designing your cart. The team at USL will work with you to ensure the appropriate accessories are provided to ensure complete functionality. Accessories include:

- Flip up shelf
- IV pole
- Defib tray
- Glove holders
- Electrical outlet box
- Above cart storage bins
- Sharps holder
- Oxygen tank holder
- Catheter racks
- Waste baskets
- Cord holder
- Chart holder
- Above cart shelf
- Containers and dividers
- Lockable drawers/carts

HERMAN MILLER HEALTHCARE ENVIRONMENT SOLUTIONS

Providing adaptable modular sections for all areas including:
- Nurse stations
- Family areas
- Patient rooms
- Pharmacy
- Laboratories
- Administration areas

Designed around the needs of today and can be adapted for the needs of tomorrow. Solutions include design and installation.

Speak to a USL representative to learn more about the Herman Miller product offerings.

- SLINGS

USL equipment
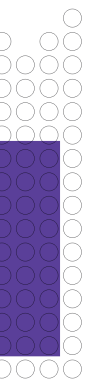

VIKING

For the most demanding lifts
Aluminium was the natural choice of material for Viking, not only for aesthetic reasons, but mainly because it makes your lift easier to manoeuvre. Aluminium also has a number of environmental advantages. Aluminium can be reused again and again, and recycling requires relatively little energy.

VIKING - XS

Ideal where space is extremely limited
A small and extremely narrow mobile lift, specially developed for settings with narrow doorways or where lifting space is particularly restricted.

Viking XS is a stable and reliable mobile lift that is ideal in most common lifting situations - eg, to and from the toilet, between bed and wheelchair, or for lifting to and from the floor.

Important features:
* Made of aluminium, good lifting capacity in relation to weight
* Total width 54cm, passes easily through the narrowest doorways

VIKING - S

Small but strong
A small, easily manoeuvred mobile lift that performs superbly in relation to its diminutive size and low overall weight - perfect in settings where space is limited

VIKING - M

The all-round lift
After 25 years of market-leading product development, we know how to design the optimal mobile lift. Viking M has most of the best features and is ideal for the most common lifting situations.

VIKING - XL

For the most demanding lift
Lifting heavy patients entails great responsibility. Although Viking XL has been specially developed for very heavy patients, it is also suitable for average-sized people. Despite its size, Viking XL weighs only 43kg and is very easy to handle.

VIKING				
CODE	DESCRIPTION	SWL	WEIGHT	LIFTING HEIGHT

L2040033	Viking XL	300 Kg	42 Kg	187 Cm

SABINA II EE

Sit-to-stand hoist, three lifts in one

Sabina differs from other sit-to-stand lifts. The well-thought-out accessories give several different possibilities in one single lift. And being able to adapt a raising motion or a lifting situation according to the patient's abilities obviously gives a better result than using the same solution for all patients. Sabina has easily exchanged sling bars. The most common is the narrow sling bar (Slingbar 350) which is used with the Liko SupportVest or Liko SafetyVest. Patients who have pressure-sensitive armpits use the Comfort Slingbar and ComfortVest. Sabina can also, to a limited extent, be used as a lift for lifting sitting patients (so called passive lifting). Lifting capacity: 200kg

GOLVO

The world's most versatile healthcare lift

Sometimes it can be difficult to choose between a mobile lift and an overhead lift. Golvo gives you both. Together with Liko's comprehensive range of functional slings and accessories, Golvo is the perfect lift for every situation, including the challenges of gait training and horizontal lifting.

Golvo features:

• Vertical lifting, the easiest and most logical lifting motion

• Flexible lift strap, adjusts the lift for the person being lifted

• Slingbar with safety latches enhances safety

• Swivelling armrest to give the patient more reassurance and the caregiver greater leverage for manoeuvring

• Parallel, equilateral base-width adjustment for easy access to wheelchairs and beds

• Electrical emergency lowering and raising

• Mechanical emergency lowering for safe and easy lowering

• Built-in charger. Charge the batteries simply by plugging the charger cable into a wall socket

• Anodized aluminium. The right choice of material from all viewpoints: environmental, quality, design, light weight and corrosion resistance

• Lifting capacity: 200kgs (440lbs)

Overhead Lifting Systems

Always there when you need them, without taking up valuable space

With an overhead lift system, you can lift and transfer patients with minimal effort and maximum safety, regardless of how the room is furnished. An overhead lift is always there when you need it and it's safe and easy to use, both for the patient and the caregiver.

Liko's overhead lift systems cover a comprehensive range of needs and consist of many different components to meet a broad diversity of installation requirements. These lift systems are appropriate in all care environments and meet the highest demands for function, safety and availability.

Our staff will help you to find the right solution for your particular situation.

Examples of application areas:

*   Multi-bed rooms
*   Room-to-room
*   Independent living
*   Pools
*   Hygiene rooms
*   Rehabilitation/physiotherapy
*   Operating rooms and critical care areas
*   Spinal cord units

ULTRATWIN

The heavy duty overhead system for the heaviest patients

With a lifting capacity of up to 460kg (1,014lbs), UltraTwin is designed for the heaviest lifting situations. Its two interacting lift motors let the caregiver both lift and position the patient to different sitting postures during the lift. UltraTwin can be installed permanently in a room or freestanding in FreeSpan.UltraTwin FreeSpan can be mounted either as a Straight Rail or as a Traverse system. The many different rail-lengths make it possible to fit the system in different types of rooms.

* Maximum load: 400-460kg (880-1,014lbs)
* Lift motors: 2 Likorall or Multirall

UltraTwin Freespan

Min 2250mm - Max 2550mm

1440mm

Min 1990mm - Max 5490mm

FREESPAN

Straight Rail or Traverse - the choice is yours

FreeSpan is the flexible alternative for most stationary-lift situations.The lift system is freestanding, and since it is not affixed to the walls or the ceiling, there are no special strength requirements for those structures.
FreeSpan is available in two versions, Straight Rail (SR) and Traverse (H-system). Choose between Multirall and Likorall lift units. FreeSpan is made of aluminium and many different rail lengths are available.

FreeSpan SR is assembled without tools. The lift system can be easily moved between rooms. FreeSpan SR is equipped with wheels, which facilitate positioning and make it easier to clean the room.

FreeSpan Traverse is a freestanding gantry-type system that enables lifting and transfer of patients between many different lifting points. The lift unit can be easily moved in all directions over a large area.

FreeSpan features:

* Straight Rail or Traverse (H-system)
* Several different rail-lengths
* Easily adjustable height and width
* Made of light-weight, extruded aluminium. The right choice of material from all viewpoints: environmental, quality, design and corrosion
* Max load: 200kg (440lbs)

MULTIRALL

A versatile overhead lifting system

Liko's quick-release hook system is the key to Multirall's flexibility. Multirall is just as appropriate for occasional lifting needs as it is for long-term ones. As a simple, portable overhead lift that does not compromise on safety or function, Multirall is unbeatable. In addition, Multirall works perfectly as a room-to-room lift.

Installation alternatives:
- Multirall can be installed on the carriage in two different ways. No tools are required
- Mounting in the motor-up position, directly to a rail carriage, enables the Multirall to function as a normal overhead lift
- Mounting in the motor-down position, with varying connection heights, enhances both portability and room-to-room capabilities with only one motor

Multirall features:
- A versatile lift that can be used in many different ways.
- Easy to move; no tools are required
- Practical accessories; trolley, helping hand
- Big handles on both sides of the lift give a good grip when transporting a patient or when moving the lift to another place
- Complete rail system including the possibility to be used in the freestanding FreeSpan
- Can be used with a wide range of Liko's accessories
- Lifting capacity: 200kg (440lbs)

Multirall Trolley: Convenient trolley for transfer, assembly and storage of Multirall and accessories.

AIRPAL®
PATIENT TRANSFER SYSTEM

Research shows us that from an injury-reduction perspective, using the right combination of beds, surfaces and lifting equipment in combination with evidence-based training is the most effective way of preventing low-back injuries.
- Allows safe, easy horizontal transfers
- Moves patients on a smooth surface of air
- Reduces risk of caregiver back injuries
- Transfers all patients, regardless of weight
- Weight capacity up to 544kg
- This type of cost-effective device reduces friction and is favoured by many caregivers to perform lateral transfers

WEEVAC TC®
PATIENT TRANSFER SYSTEM

The WEEVAC TC is designed for adults and older children. It has proven to be invaluable in the fast and secure evacuation of hospitals, nursing homes and chronic care facilities. Allows safe, easy horizontal transfers.

Its one-piece construction is fully adjustable to snugly and securely cocoon patients of any size in a heat insulating, protective layer of waterproof mylar laminated vinyl.

A special fabric covers the bottom to facilitate sliding patients on all floors and stairs. The WEEVAC TC is only as wide as the patient, essential in narrow hallways and stair-wells. Two long front straps allow your staff to face forward while pulling the patients.

The WEEVAC TC cocoons a patient in a heat insulating, waterproof system that pro-vides secure storage for a patient's chart and any additional equipment. In compari-son, the blanket above has no handholds to facilitate carrying a patient, cannot pro-tect or secure a patient's chart and is not weather proof.

Weight	2.35 kg

Liko
A Hill-Rom Company

Design Focusing on Safety, Function and Comfort.

Our slings are known for having high quality. For thirty years, in close cooperation with users and patients, we have developed functional and easy-to-use lifting accessories, always with the focus on safety, function and comfort.

World-Class Documentation.

Instruction Guides describing the sling's application are included with each sling. Here, guidelines will help you to determine which sling bar is best suited.

   A Quick Reference Guide is available for all basic models. These brief instructions contain the most important information on the application and care of the sling.

The Fitting Protocol facilitates fitting, since it allows the caregiver to fill in current settings for a specific patient.

   A Periodic Inspection Protocol is available to facilitate periodic inspection. These describe thoroughly which critical items need checking.

Did you know ...

… that choosing the right material is an important link in the chain when selecting a sling. Our slings are fabricated in different materials, each of which has special characteristics and advantages. The most common is the **green polyester fabric**, which is optimal with regard to wear resistance and durability. For bath and shower situations we recommend a sling in **plastic-coated net**, which dries quickly. When the sling is to be left in place, the net polyester, available in two grey qualities and one green, is preferable. Our Solo™ material for disposable slings is unique, as it is made of a very strong **non-woven material**. Many of the smallest sizes of our slings are specially designed for children and are made of a **teddy-patterned polyester fabric**.

Our lifting accessories are approved for 200 kg (440 lbs) maximum load unless otherwise specified.

Tested and Approved.

Liko™ slings have been tested by an accredited testing institute and comply with all requirements for MDD Class I products. They also comply with all requirements in accordance with harmonized standards EN ISO 10535-2006. Our lifting accessories are approved for a maximum load of 200 kg (440 lbs) unless otherwise specified, but we also have slings with a maximum load of 500 kg (1100 lbs) in our wide sling range.

!   *Do not use damaged lifting accessories!*

equipment

1. Product Label which clearly states the sling model, size and design. Here, you also find laundry advice and maximum load for the sling.

2. Patient Marking Label, sewn onto the sling. Space for five different names is provided.

3. Periodic Inspection Label for marking inspection dates. You simply make a hole in the appropriate square to mark the current month and year. This provides for a durable marking which does not disappear during laundering.

4. Thoroughly tested **reinforced seams** (bartacks) and reinforced straps for optimum strength and safety. The reinforced seam, which is load tested, is placed where the increased load occurs. Placement of the seam has been determined through careful testing.

5. Size Markings in different colours. On most of the sling models this colour marking is placed as a middle back strap which also facilitates the correct application of the sling on the patient.

6. The slings are available in many carefully **selected materials** to function optimally in different application areas.

7. Leg Supports in many different designs – fabric only, padded and reinforced to meet all different needs. Wide and long leg supports provide an optimum support area for maximum comfort and pressure relief.

8. Edgings sewn in a single piece, with few joints to ensure maximum strength, since seams are the weakest link.

Our sling models are **carefully designed** to ensure that the patient sits with pressure well-distributed between legs and back section for good support during transfers. This enables an optimal sitting posture, so that the patient ends up in the right place during transfers.

Slings for Patient Needs.

For many years we have adhered to the motto *"The Sling is Half the Lift"*. The sling is the determining factor for how well the lift is performed; it is the link between the lift and the patient. All sling models have unique characteristics to meet a wide range of specific lifting needs. Some sling models are called basic models because they cover a wider need for lifting different patients. These are used for common lifting situations, such as lifting from/to bed/stretcher/chair/wheelchair. Some can also be used when lifting from the floor.

Did you know ...

… that no lift is like another. It is exactly for that reason that we have one of *the widest ranges of lifting accessories*. Each of our sling models has unique features to meet specific lifting needs. With our spectrum of slings and accessories we can provide for both the *most common lifts on a care unit and the more demanding special cases.* These considerations have guided us in our *development work for more than 30 years.* We venture to say that we know what works.

LIKO™ UNIVERSAL SLING™, MOD. 000, 002

A basic model which fits most patients. The Universal Sling is excellent for older patients with limited mobility. It enables an upright sitting posture with support for the entire back. Mod. 002 is a version that gives extra high lifting height. An excellent sling to start with.

• Excellent basic model, suits most patients
• Gives support for the whole back
• The patient's arms are positioned inside the sling
• Gives an upright sitting posture (000)
• Mod. 002 gives extra lifting height

SIZES: S, MS, M, L, XL*
FABRICS: Polyester, net polyester, plastic-coated net

LIKO™ SOFT ORIGINAL HIGHBACK SLING™, MOD. 26 BESTSELLER

Liko™ Soft Original HighBack Sling™ has a developed fit and comfort with convenient head rest in seated position. It enables a reclined sitting posture with support for the head and is therefore suitable for patients with poor head and torso stability. Soft Original HighBack Sling™ is very suitable for lifting to and from the floor.

• Suits most patients
• Best choice for transfers from horizontal (lying) position
• Optimized fit and comfort
• Provides extra comfortable support for the head
• Comfortable reclined sitting posture

SIZES: XS, S, MS, M, L, XL, XXL*
FABRICS: Polyester, teddy-patterned knitted polyester (children)

LIKO™ ORIGINAL HIGHBACK SLING™ MOD 20

Liko™ Original HighBack Sling™ enables a reclined sitting posture with support for the head and is therefore suitable for patients with poor head and torso stability. It is very suitable for lifting to and from the floor.

• Suits most patients
• Excellent choice when lifting from a flat position
• Gives good support for back and head
• Comfortable reclined sitting posture

SIZES: XS, S, MS, M, L, XL, XXL*
FABRICS: Net polyester, plastic-coated net, polyester, teddy-patterned knitted polyester (children)

LIKO™ ORIGINAL SLING™ MOD. 10/11

Liko™ Original Sling™ has a medium-high back which allows the patient to hold one or both arms outside the sling. The sling fits the active user; it is simple and supple to work with and enables a comfortable sitting posture. Furthermore, it is available in a wide assortment of sizes and versions.

• Allows patient participation
• Excellent for transfers from sitting to semi-reclining
• Excellent back support up to shoulder blades
• The patient may rest the arms on the inside or outside
• Easy to apply

SIZES: XS, S, MS, M, L, XL *
FABRICS: Polyester, net polyester, plastic-coated net, teddy-patterned knitted polyester (children)

* Some sizes and designs with a max. load of 300-500 kg (660-1100 lbs).

Assistance When You Need it Most.

Lifting in connection with toilet transfers requires more from a sling. Our slings facilitate easy dressing/undressing of the patient during the actual lifting procedure. These lifting operations are often perceived by caregivers as difficult and awkward. Our range, with several different models which provide different levels of support and safety, eases the pressure for everybody.

LIKO™ HYGIENE SLING™ MOD. 40, 41 → BESTSELLER

A simple and easy-to-use sling which suits most patients. It facilitates dressing/undressing for transfers to and from the toilet. The sling is suitable for patients with a certain degree of body stability. Hygiene Sling™ mod. 41 is equipped with a belt and has improved fit. Mod. 41 is an excellent sling to start with.

- For patients with good torso stability
- Easy to apply
- Facilitates dressing/undressing during hygiene transfers
- The patient holds his/her arms outside the sling
- Mod. 41 is equipped with a belt for increased safety and security

SIZES: XS, S, M, L, XL *
FABRICS: Polyester, teddy-patterned knitted polyester (children)

LIKO™ HYGIENE SLING™ MOD. 45, 46

Hygiene Sling™ Mod. 45 is equipped with a SafetyBelt™ which lifts around the upper body for extra stability. Besides the SafetyBelt™, Mod. 46 is also equipped with an extra high back support.

- Equipped with SafetyBelt™, suitable for patients with poor torso stability
- Enables dressing/undressing during hygiene transfers
- Can be used with one of the patient's arms on the inside
- Mod. 46 is equipped with back support which provides extra support, safety and comfort

SIZES: XS, S, M, L, XL *
FABRICS: Polyester, teddy-patterned knitted polyester (children)

LIKO™ HYGIENE VEST™ MOD. 50, 55

The Hygiene Vest is a unique sling specially designed to safely and securely lift patients with low muscle tone to the toilet. The Hygiene Vest enables an upright sitting position, with firm support around the upper body. Simultaneously, it leaves a large portion of the lower body free for dressing/undressing. The Hygiene Vest Mod. 55 is equipped with head support.

Mod. 50:
- Suitable for patients with high/low tone and spasticity
- Facilitates dressing/undressing during hygiene transfers
- Supports and lifts around the upper body
- High security for hygiene transfers
- Upright sitting posture

SIZES: XXS, XS, S, M, L, XL, XXL, XXXL *
FABRICS: Polyester, teddy-patterned knitted polyester (children)

Mod. 55:
- Excellent for patients with spasticity
- Facilitates dressing/undressing during hygiene transfers
- Gives good support for back and head
- High security for hygiene transfers
- Supports and lifts around the upper body

SIZES: XXS, XS, S, M, L, XL
FABRICS: Polyester, teddy-patterned knitted polyester (children)

usL equipment

101

* Some sizes and designs with a max. load of 300 kg (660 lbs).

All Needs are Special,
Some More than Others.

Our product line includes sling models which are more specialized to facilitate optimal use in a specific application area. Examples include lifting amputees or bariatric patients. To meet the need for slings for short-term use by a single patient, and as a way of avoiding the need for laundering, we have also developed a series of disposable slings. Thanks to our wide range, we can meet most needs.

We continuously work on developing new models and improving existing ones, which means we can offer customized slings for patients with very special needs.

LIKO™ AMPUTEE SLING™ MOD. 70, 75

The Amputee Sling has a special design with extra strap control which prevents the leg supports from sliding apart. We recommend the Amputee Sling for patients with high, double-sided leg amputations or other patients needing this extra security.

The Amputee Sling is available in two back heights; Mod. 70 supports up to shoulder height and Mod. 75 also supports the head.

- For patients with single or double-sided femoral amputations
- Suitable for patients who tend to slip out of other slings
- Gives excellent support for back and head (Mod.75)
- Slightly reclined sitting posture

SIZES: S, M, L, XL *
FABRICS: Polyester, net polyester

LIKO™ SOLO HIGHBACK SLING™ MOD. 25

To meet the need for slings for short-term use by a single patient, and as a way of avoiding the need for laundering, we have developed a series of disposable slings. The Solo High Back Sling™ is suitable for most patients and can be used for common transfers.

• Suits most patients
• Excellent choice when lifting from a flat position
• Gives excellent support for back and head
• Comfortable reclined sitting posture
• Disposable sling intended for single use (do not wash)

SIZES: MS, M, L, XL, XXL *
FABRICS: Nonwoven material

LIKO™ COMFORT SLING PLUS™ MOD. 300, 310

Comfort Sling Plus™ is a further development of the Comfort Sling™ (Mod. 30, 31) with improved comfort and fit. Comfort Sling Plus™ enables an upright sitting posture and support for the entire back.

Comfort Sling Plus™ is applied and removed with the patient in a supine position and is then left in the chair after the transfer. Model 310 is equipped with a hygiene opening.

• Excellent for patients with arthritis/leg amputation
• The sling is left in place under the patient
• Sling model with a possibility of open hip joint angle combined with a 4 point sling bar

SIZES: M, L, XL *
FABRICS: Net polyester, plastic-coated net

LIKO™ COMFORT SLING PLUS HIGH™ MOD. 350, 360

Comfort Sling Plus High™ is a further development of the Comfort Sling™ (Mod. 35, 36) with improved comfort and fit. Comfort Sling Plus High™ gives a slightly reclined sitting posture and support for the entire back. It is equipped with a soft head support. Comfort Sling Plus High™ is applied and removed with the patient in a supine position and is left in the chair after the transfer. Model 360 is equipped with a hygiene opening.

• Excellent for patients with arthritis/leg amputation
• The sling is left in place under the patient
• Sling model with a possibility of open hip joint angle combined with a 4 point sling bar
• Provides extra comfortable support for the head

SIZES: M, L, XL *
FABRICS: Net polyester, plastic-coated net

LIKO™ SILHOUETTE SLING™ MOD. 22

The Silhouette Sling™ provides a reclined sitting posture with comfortable head support. It is specially designed for transfers to narrow wheelchairs where the sling should be left in the chair. The Silhouette Sling™ is thin and pliable without handles or reinforcements.

• A pliable sling in net polyester for lifting to silhouettes and moulded seats
• Excellent for patients with postural deformities
• May be left under the patient after transfer
• Gives good support for back and head
• The patient may rest the arms on the inside or outside

SIZES: XS, S, M, L
FABRICS: Net polyester

* Some sizes and designs with a max. load of 300–500 kg (660–1100 lbs).

Heavy Patients Become Lighter with the Right Aids.

Lifting heavy patients requires special aids and special technology. With a maximum load of up to 500 kg (1100 lbs), the Liko™ UltraTwin™ system can handle really heavy lifts. Thanks to two interacting lift motors, the patient can be placed in a seated, semi-reclining or horizontal position. By controlling the two lift motors individually, the sitting position can be adjusted for maximum comfort. Liko has extensive experience of working with overweight patients. For many years we have worked in close collaboration with several large hospitals around the world which specialize in the care and treatment of bariatric patients.

SLINGS

equipment

104

LIKO™ ULTRA SLING™, MOD. 06

The Ultra product series has been developed for lifting bariatric patients in a safe and comfortable way.

Ultra Sling™ supports the entire back up to the shoulders. With the unique design, the leg supports are installed individually on the sling bar, which gives the stomach space and the legs optimal support. Ultra Sling™ is available in three sizes, where Long also provides extended support for the lower legs.

- Designed for bariatric patients
- Provides extra space for the abdomen
- Can be used in combination with the Liko UltraTwin™ lift system, size Short can also be used with Universal TwinBar™ 670
- Max. load 500 kg (1100 lbs)

SIZES: Short, Regular, Long
FABRICS: Polyester, (net polyester)

LIKO™ SOFT ORIGINAL HIGHBACK SLING™ MOD. 26

Soft Original HighBack Sling™ has a developed fit and comfort with comfortable head support in the seated position. Soft Original HighBack Sling™ provides a reclined sitting position with support for the head and is therefore suitable for patients with poor head and torso stability. Soft Original HighBack Sling™ is ideal for lifting to/from the floor. The larger sizes of Soft Original HighBack Sling™ can be used to advantage for lifting heavier patients, preferably in combination with a Universal TwinBar™ 670, Sling Cross-Bar 670 or SideBars, depending on how much space the patient needs.

- Suits most patients
- Optimized fit and comfort
- Provides extra comfortable support for the head
- Comfortable reclined sitting posture
- Max. load 500 kg (1100 lbs)

SIZES: For patients weighing 200-500 kg (440-1100 lbs) sizes XL, XXL are available
FABRICS: Polyester

ULTRA LIFTPANTS™ MOD. 920

Getting heavy patients onto their legs is a very important step in their rehabilitation, for example, after an operation. The unique Ultra LiftPants™ give good support to the whole body and give the patient the confidence to take those first steps.

- For patients who can put weight on their legs
- Safe and secure for raising, standing, gait and balance training
- Allows natural pattern of movement when rising
- Takes the strain in the crotch and by the hip loop straps
- Accessories: Solo cover, padded cases for the shoulder straps
- Max. load up to 500 kg (1100 lbs)

SIZES: XXL, XXXL
FABRICS: Net Polyester

Secure Slings for Children.

Lifting children is not the same as lifting small adults. Children have special needs and therefore require products that are specifically designed to meet these needs. We have extensive experience in this area and were first in offering lifting accessories specially adapted for children. We continuously work on developing technology and models for our younger patients, and today most of our sling models are available in versions that are specially designed for children. Many of our pediatric models are available in a teddy-patterned fabric to appeal to the smallest.
We call them "TeddySlings".

TEDDYSLING ORIGINAL™
LIKO™ ORIGINAL SLING™, MOD. 10

This sling is suitable for lifting to/from a seated/semi-reclining position or from the floor if the child does not need special support for the head. Support the entire back up to the shoulders.

• Belt with SafetyBuckle

SIZES: XS, S
FABRICS: Teddy-patterned knitted polyester (children), polyester (S only), net polyester, plastic-coated net (S only)

TEDDYSLING SOFT ORIGINAL™ MOD. 26
LIKO™ ORIGINAL HIGHBACK SLING™ MOD. 20

These models enable a relaxed, reclined seated position. They can be used for all transfers to and from the horizontal and seated positions. Perfect for transfers to and from the floor. Mod. 26 is also equipped with a reinforced head section and allows a more upright seated position and excellent support for the patient. Children with spasticity problems often sit well in Mod. 26.

• Belt with SafetyBuckle
• Mod. 26 also has reinforcement in back, head and leg supports

MOD. 20:   SIZES: XS, S   FABRICS: Polyester, net polyester, plastic-coated net
MOD. 26:   SIZES: XS, S   FABRICS: Teddy-patterned knitted polyester (children)

LIKO™ SILHOUETTE SLING™ MOD. 22

We have developed the Silhouette Sling™ especially for children who sit in moulded seats and therefore need the sling to be left in the chair after the transfer. Their arms can be held inside or outside the sling.

• May be left in the chair after transfer
• Gives excellent support for back and head

SIZES: XS, S
FABRICS: Net polyester

FOR MORE INFORMATION CONTACT:
USL MEDICAL CUSTOMER SERVICES ON 0800 658 814

TEDDY HYGIENE SLING™/LIKO™ HYGIENE SLING™ MOD. 41
TEDDY HYGIENE SAFETY SLING™ MOD. 46

We developed these slings for transfers to and from the toilet, but they can also be suitable for other lifting situations. Mod. 41 is equipped with a belt, Mod. 46 has a SafetyBelt™ and extra back support for best comfort. Both models have soft padding under the arms and reinforced leg supports.

MOD. 41:   **SIZES:** XS   **FABRICS:** Teddy-patterned knitted polyester (children), polyester
MOD. 46:   **SIZES:** XS   **FABRICS:** Teddy-patterned knitted polyester (children)

TEDDY HYGIENE VEST/LIKO™ HYGIENE VEST™ MOD. 50
TEDDY HYGIENE VEST HIGH BACK™/LIKO™ HYGIENE VEST HIGH BACK™, MOD. 55

We developed these slings for transfers to and from the toilet, but they can also be used for other lifting situations where an upright and steady sitting position is desired. The vest lifts around the upper body, which prevents any tendencies for the child to collapse. Children with spasticity problems often sit well in Mod. 55.

• Reinforced leg supports
• Model 55 has a head support

MOD. 50:   **SIZES:** XXS, XS   **FABRICS:** Teddy-patterned knitted polyester (children), polyester (XS only)
MOD. 55:   **SIZES:** XXS, XS   **FABRICS:** Teddy-patterned knitted polyester (children), polyester

TEDDYVEST™/LIKO™ MASTERVEST™ MOD. 60
TEDDYVEST™ FRONT CLOSURE MOD. 64

These models adapt to the child and lift around the upper body just enough to allow the child to stand to the best of his/her ability.

• Model 64 is equipped with SafetyBuckles in the front for width adjustment.
• Leg harness and padded casing for shoulder strap (pictured) are accessories.

MOD. 60:   **SIZES:** XXS, XS   **FABRICS:** Teddy-patterned knitted polyester (children), polyester (XS only)
MOD. 64:   **SIZES:** XS   **FABRICS:** Teddy-patterned knitted polyester (children)

TEDDYPANTS™ MOD. 92

TeddyPants in teddy fabric make standing training a pleasure under secure conditions. With the adjustable setting in the waist, the child gets good support around the torso.

• Padded with synthetic sheepskin against the stomach and in the crotch.

SIZES: XS
FABRICS: Teddy-patterned knitted polyester (children)

TEDDYVEST FOR STANDINGSHELL™
LIKO™ VEST FOR STANDINGSHELL™ MOD. 67

We have developed the Vest for StandingShell for the difficult lifting of a child in a standing shell from the floor to a standing position. The lift takes the entire weight, and the child is lifted securely, with comfortable support for the whole body and the head.

• Head support and padded leg harness included.

SIZES: XXS, XS, S
FABRICS: Teddy-patterned knitted polyester (children), polyester (S only)

Stand and Walk with the Freedom to Move.

Our lifting accessories for stand/gait/mobility training allow you to achieve objectives that are often difficult to reconcile, such as giving the patient physical training without the caregivers and nursing staff risking strain injuries.

During transfers or training, the lift takes all the weight, so that the patient and caregiver can devote all their attention to the task without having to worry about the consequences of a wrong step.

Did you know ...

… that our *springs for jump/gait training* give a "bouncy" walk and are used in combination with Liko™ LiftPants™ or Liko™ MasterVest™. The springs are both amusing and stimulating for the patient.

LIKO™ MASTERVEST™ AMBULATION SUPPORT MOD. 60, 64

The vest facilitates sit-to-stand lifting of patients who are able to support their own weight once they are standing. MasterVest™ Ambulation Support is a good aid for standing, gait and balance training. When transferring to or from the toilet, the lower body is free for dressing/undressing. Liko™ MasterVest™ Ambulation Support with front closure, Mod. 64, allows patients to button/unbutton the vest by themselves. The leg harness is available as an accessory in sizes for adults and children.

Mod. 60:
• For patients who can put weight on their legs
• Safe and secure for rising, standing, gait and balance training
• Allows natural pattern of movement when rising
• Excellent for hygiene transfers, lower body free
• Can be complemented with Leg Harness

SIZES: XXS, XS, S, M, L, XL, XXL *
FABRICS: Polyester, plastic-coated net (S, M, L only), teddy-patterned knitted polyester (children)

Mod 64:
• Same application areas as mod. 60
• With front closure
• Adjustable in the front for bust and stomach
• For independent patients
• Can be complemented with Leg Harness

SIZES: XS, S, M, L, XL, XXL
FABRICS: Polyester, plastic-coated net (M only), teddy-patterned knitted polyester (children)

LIKO™ LIFTPANTS™ AMBULATION SUPPORT MOD. 92

With Liko™ LiftPants™ Ambulation Support the patient can gait train under secure conditions. The LiftPants Ambulation Support provides freedom of movement, while relieving some or all of the burden of body weight. It supports safely, allowing the patient to move on his/her own without the risk of falling.

• Relieves the burden of body weight during standing and gait training
• Helps the patient with poor leg function to "walk"
• Allows great mobility in the room
• LiftPants are available in various sizes. All sizes, except the XS, are made of net polyester with a pressure-relieving padded crotch. A heavy person may need a bigger size than a thin person of the same height.

SIZES: XS, S, M, L, XL*
FABRICS: Net polyester, teddy-patterned knitted polyester (children)

LIKO™ VEST FOR STANDINGSHELL™ MOD. 67

A standing shell is much appreciated as an aid for disabled children and youths. However, applying the standing shell manually and raising the child in it can be very strenuous for the caregiver. But with the right lifting aids, these problems can be avoided.

• Allows patient participation
• Lifting a patient wearing a standing shell from a horizontal to a standing position
• Valuable aid for the rehabilitation of children and youths
• Leg harness included
• Does not put weight on the standing shell

SIZES: XXS, XS, S, M, L
FABRICS: Polyester (S, M, L only), teddy-patterned knitted polyester (children, XXS, XS, S only)

* Some sizes and designs with a max. load of 300-500 kg (660-1100 lbs).

Sit-to-Stand Transfers with the Sabina™ Lift.

The Sabina™ lift is an easy-to-use, versatile sit-to-stand lift intended for patients who are able to actively participate in the raising procedure. When standing, they can be moved to a wheelchair or to a toilet; this gives them *standing practice in connection with the transfer*.

Raising is aided by a support vest which lifts the patient's upper body. Several different types of support vests are available to meet the needs of different patients. For example, the vest can be placed under or outside the patient's arms. Sabina™ lift has a wide range of different vest models and accessories.

LIKO™ SUPPORTVEST™ SIT-TO-STAND AID MOD. 91 ▷ BESTSELLER ◁

Liko™ SupportVest™ Sit-To-Stand Aid is a comfortable sit-to-stand vest which is simple to use and requires little individual setting. It is used for patients who need a lot of help to raise themselves but who can then stand firmly on their own legs. It lifts behind the back and under the arms. The SupportVest™ Sit-To-Stand Aid can be used with or without sheepskin padding; the inside of the vest is corduroy-lined and prevents gliding. It has removable sheepskin padding which is attached with zippers. Extra padding is available as an accessory. It is attached around the body with an adjustable waist belt, which is intended to hold the vest in place during application. This model is an excellent sit-to-stand vest to start with.

- Fastened around the body with a belt
- Comfortable with removable padding
- Adjustable waist belt
- Used in combination with Sabina™ SlingBar 350
- Suitable for more stable patients
- Extension belt and extra padding available as accessories

SIZES: S, M, L, XL
FABRICS: Polyester, lined with corduroy

LIKO™ SAFETYVEST™ SIT-TO-STAND AID MOD. 93
LIKO™ SAFETYVEST™ SIT-TO-STAND AID WITH EXTRA BACK SUPPORT™ MOD. 94

The SafetyVest™ Sit-To-Stand Aid is a sit-to-stand vest which is unique in safety, form and function. It lifts behind the back and around the torso. The waist belt contributes to safety by preventing the risk of the patient sliding out. The safety principle in the tensioning devices of the vest means that we combine two interacting loops on each hook. (Same as on the MasterVest™ Ambulation Support, Hygiene Vest™ Therapy and Hygiene Sling™, Mod. 45/46). The SafetyVest™ Sit-To-Stand Aid is lined with plastic-coated net, which provides high friction and effectively prevents sliding. The SafetyVest™ Sit-To-Stand Aid with extra back support, Mod. 94 has higher back support and lower bottom edge, which distributes the pressure more softly over a larger area of the back. Suitable for patients with poor stability and difficulties standing.

- For extra safety/security
- Suitable for the patient with poor standing balance
- Mainly intended for use with the Sabina™ SlingBar 350
- Individual fitting
- Mod. 94 provides extra support behind the back
- Sheepskin padding available as accessory

SIZES: M, L
FABRICS: Polyester, padded with plastic-coated net.

LIKO™ COMFORTVEST™ SIT-TO-STAND AID MOD. 95

Liko™ ComfortVest™ Sit-To-Stand Aid differs in a principally decisive way from other sit-to-stand vests. It consists of two parts; the outer vest lifts behind the back and outside the arms and the inner waist belt, which is attached to the bottom edge of the outer vest, prevents sliding and thereby contributes to increased safety. The safety principle in the tensioning devices of the vest means that we combine two interacting loops on each hook (same as on the MasterVest™ Ambulation Support, SafetyVest™ Sit-To-Stand Aid, Hygiene Vest™ and Hygiene Sling™, Mod. 45/46). No part creates any pressure in the armpits, which makes this vest ideal for acutely sensitive and stroke patients.

- Suitable for patients with standing difficulties
- To avoid pressure under the armpits; e.g., for stroke patients and acutely sensitive patients
- Lifts behind the back and outside the arms - not under the arms
- Waist belt lifts around the torso and prevents slipping
- Individual fitting
- Used in combination with Sabina™ Comfort SlingBar

SIZES: S, M, L, XL
FABRICS: Polyester, padded with plastic-coated net.

LIKO™ SOLO SUPPORTVEST™ SIT-TO-STAND AID MOD .911

Solo SupportVest™ Sit-To-Stand Aid is used when a sling for short-term use by individual patients is needed or when you want to avoid laundering. Used together with Liko™ Sabina™ Sit-to-Stand Lift to raise a patient from a seated to a standing position. Solo SupportVest™ Sit-To-Stand Aid lifts behind the back and under the arms.

- Intended for short-term use by individual patients from a sitting to standing position
- No laundry — discarded after soiling or completed use
- Used in combination with Sabina™ SlingBar 350

SIZES: M, L
FABRICS: Nonwoven material

Guide to Product Range Symbols

The Risk Categories contained in our product information correspond with the Waterlow Pressure Ulcer Prevention/Treatment Policy. Please note that all Pressure Ulcer Grading systems are not intended to be used prescriptively for equipment selection or replace clinical judgement which should always be the overriding factor in pressure ulcer prevention and treatment planning.

Very High Risk

20+ Very High Risk Waterlow Score
Suitable for use with patients clinically evaluated to be at Very High Risk of developing pressure damage.

High Risk

15+ High Risk Waterlow Score
Suitable for use with patients clinically evaluated to be at High Risk of developing pressure damage.

At Risk

10+ At Risk Waterlow Score
Suitable for use with patients clinically evaluated to be At Risk of developing pressure damage.

Clinical Application

Our product range is designed to provide solutions for use on all categories of pressure ulcers, in the prevention and treatment stages up to and including category IV. Direct Healthcare Services mattress systems work in conjunction with good nursing procedures and in line with tissue viability protocols.

ACCUMAX™ QUANTUM™ CONVERTIBLE MATTRESS

The top of the line AccuMax™ Quantum™ Convertible is a non-powered pressure relief mattress that can be converted into a powered pressure relief mattress.

Some special features include a hand-crafted co-polymer and fibre topper, designed therapeutic pressure zones, plus a gentle heel slope.

These features all provide unsurpassed patient benefits and comfort.

The Convertible also includes our exclusive Airport™ connection system as standard equipment to allow quick and easy conversion to a powered system with gentle, alternating pressure capability - as easy as 1, 2, 3!

Clinical Application / PU Grading

Technical Specifications

Product Code	MAT/MERADV/198/88/15
Risk Category	Very High Risk
Weight Limit	No minimum weight limit. Product evaluated to 40 stone / 254kg capacity
Warranty	2 Years
Dimensions	Standard Size (Length) 198cm x (Width) 88cm x (Height) 15cm
Product Weight	13.3kg mattress / 1.7kg Power Unit
Cycle Time	10 minutes
Mode of Operation	Electronic
Voltage	220V – 240V / 50HZ
Power Consumption	10W

Please note this product is also available with PU covered umbilical.

Infection Control / Hypochlorite Solution Compatible
Mattress Cover / Power Unit to be wiped down with Hypochlorite solution and warm water appropriately diluted.

The **Dyna-Form Mercury Advance** is a dynamic mattress replacement system combined with the benefits of modern foam technology. It is specifically designed for patients considered to be at 'Very High Risk' of pressure ulcer development. Offering high levels of patient comfort, this unique system has the facility to "step up" to that of a dynamic mattress when clinically required. Similarly, the mattress's function can be downgraded as the patient's condition improves.

These features make it particularly beneficial for use within the patient's home or palliative care environment and help reduce logistic and decontamination costs. The clinical benefits of a single system are equally applicable to those of a modern hospital setting. A higher maximum weight capacity, up to 40 stone / 254kg, allows the product to meet the modern challenges of those heavier clients. All component parts are interchangeable and replaceable, maximising product life and reducing environmental impact. The outer cover comprising a high frequency welded, multi stretch and vapour permeable fabric satisfies the strictest infection control policies.

equipment

Intelligent®
Pressure Care
Management

Making a
Measurable Difference

Dyna-Form®
Static Air HZ

Dyna-Form® Static Air HZ – A New Generation of Static Support Surface, developed in conjunction with the Welsh Wound Innovation Centre.

Dyna-Form Static Air HZ is a mattress replacement system that combines the benefits of effective air displacement technology with the best of modern foams for a new standard of innovative pressure ulcer prevention and management. A new and unique 'air only' Intelligent Heel Zone and specially designed U-Core effectively offload pressure on the particularly vulnerable heel area. Dyna-Form Static Air HZ is specifically designed for patients considered to be at **'Very High Risk'** of pressure ulcer development.

With patient compliance enhanced through the high levels of comfort offered and requiring no powered pump the system is ideal in community and palliative care settings whilst the clinical benefits and ease of use make it equally suitable in the acute ward environment. Incorporating air and foam and air only cells in the unique low pressure heel zone, a patented valve system allows Reactive Airflow System (RAS™) technology to adjust to the patient's body weight and movement.

Dyna-Form Static Air HZ pressure maps 20% better than a high specification foam mattress and has a higher maximum weight capacity of up to 40 stone / 254kg. All component parts are interchangeable and replaceable, maximising product life, reducing dynamic mattress usage and offering a very cost effective solution to pressure care management. The outer Dartex™ vapour permeable, multi way stretch fabric cover incorporates high frequency welded seams and deep flap zip protection conforming to the strictest infection control policies.

Technical Specifications

Product Code	MAT/STAT/HZ/198/88/15
Risk Category	Very High Risk
Weight Limit	No minimum weight limit. Product evaluated to 40 stone / 254kg capacity

Dyna-Form™
Mercury

The **Dyna-Form Mercury** mattress is specifically designed for users considered to be at **"High Risk"** of pressure ulcer development. Comprising of a specialist "castellated cut" and blends of the finest quality Combustion Modified High Resilient foam (CMHR) this product provides not only the best pressure re-distribution properties, but great patient comfort & product longevity. Side Wall construction enables primary stability for patient transfer purposes. Complete with a durable, multi-stretch, vapour permeable cover and a toughened polyurethane base, the **Mercury** mattress provides an important contribution towards the infection control and tissue viability standards of a modern hospital, nursing or homecare environment.

Features

	Features	Benefits
1a 1b	Castellated foam insert (with tear duct cut)	**1a** smaller castellated cells for heels and larger cells sacrally
2	Finest quality CMHR foam base and side walls	Prevents patient bottoming out and aids patient transfer
3	Multi-stretch, vapour permeable fabric (impregnated with an anti fungal agent)	Reduces shear & friction forces, whilst assisting infection control policies
4	Fully high frequency welded cover	Prevents fluid ingress & aids decontamination processes (can be laundered up to 95°C)
5	Toughened PU / non-slip base	Provides a robust protective surface against hydrolysis / strikethrough
6	Fully replaceable parts	Ensures great value for money

equipment
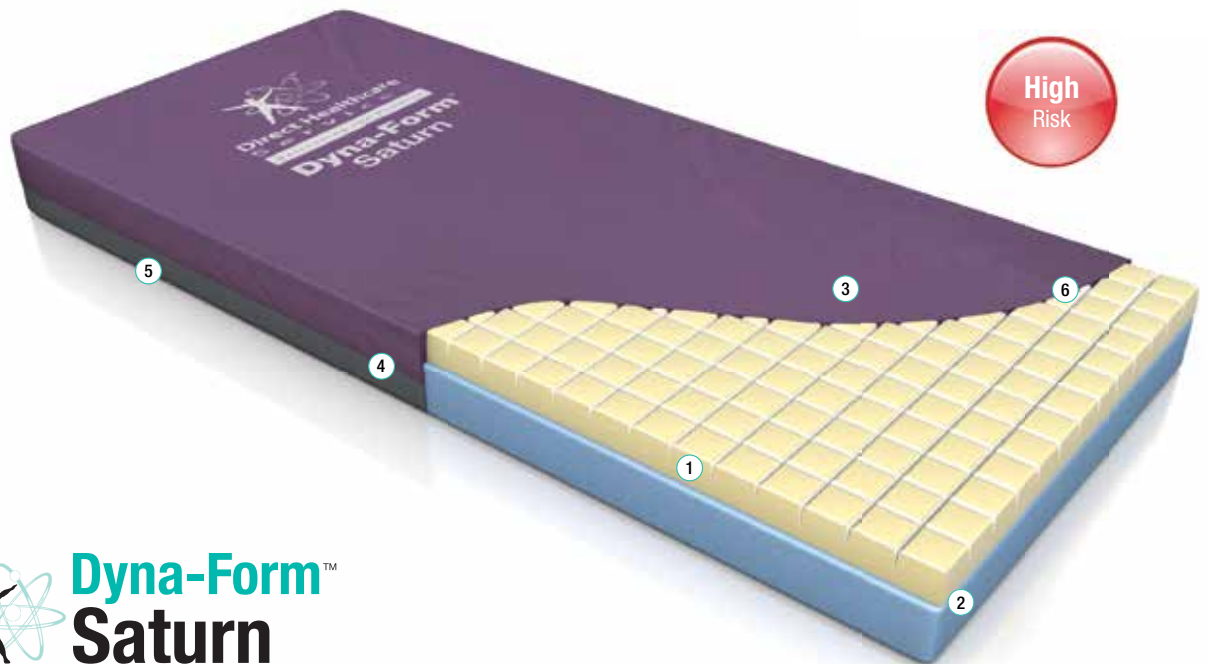

Dyna-Form™ Saturn

The **Dyna-Form Saturn** mattress is designed for users considered to be that of **"High Risk"** of pressure ulcer development and for patients requiring complete comfort, whilst maintaining the highest pressure care support from a static mattress. By using a blend of temperature sensitive, visco elastic foam at patient interface with the finest quality CMHR foam, the **Dyna-Form Saturn** provides excellent pressure re distribution properties, but with patient comfort foremost considered within its design. Longevity is enhanced by using a mixture of modern foam technology and a contemporary cover. **Saturn's** durable, multi-stretch, vapour permeable cover also possesses a toughened polyurethane base for use on all bed frame designs.

Features / Benefits

#	Features	Benefits
1	Temperature sensitive visco elastic foam surface (castellated cut)	Provides excellent patient comfort by conforming to the body contours
2	Finest quality CMHR foam base	Prevents patient bottoming out and enhances longevity
3	Multi-stretch, vapour permeable fabric (impregnated with an anti fungal agent)	Reduces shear & friction forces, whilst assisting infection control policies
4	Fully high frequency welded cover	Prevents fluid ingress & aids decontamination processes (can be laundered up to 95°C)
5	Toughened PU / non-slip base	Provides a robust protective surface against hydrolysis / strikethrough
6	Fully replaceable parts	Ensures great value for money

HELP TO REDUCE SKIN TEARS BY USING SLIDESHEETS

- Slide sheets help reduce sheer and friction when moving residents on beds.
- Training is required as incorrect application can cause injury to both carers and residents.

SLIDE SHEETS ARE USED FOR:

- Moving residents in bed
- Turning residents on to their side in bed
- Transferring residents from a bed to a bed with a transfer board
- For residents who has fallen into a confined space; slide sheets can be used to move the residents along the floor to a location where a hoist can be used
- Facilitating independent bed mobility.

INTELECT®
MOBILE COMBINATION UNIT

- 1 and 3 MHz ultrasound frequencies
- Pulsed and continuous ultrasound therapy operation (10%, 20%, 50% and 100%)
- Variable duty cycle outputs of 16Hz, 48Hz, or 100Hz for ultrasound
- Multiple waveforms on board: (2 Pole IFC, 4 Pole IFC, Galvanic, High Voltage Pulsed Current (HVPC), Microcurrent, Russian, Träbert, Monophasic Triangular, Monophasic Rectangular, Diadynamic, VMS and TENS)
- 15 user-defined memory positions
- Lightweight design, along with battery powered option
- Unit uniquely designed for tabletop, wall mount or mobile use
- Ergonomically designed soundheads for ultrasound therapy in variety of sizes (1cm^2, 2cm^2, 5cm^2 and 10cm^2)
- All sound heads are interchangeable due to Electronic Signature™ residing
- 3 year warranty (accessories 1 year)

INTELECT®
ADVANCED COMBO
THERAPYSYSTEM

Clinically convenient, the Intelect® Advanced Therapy System provides all the necessary tools in one package to maintain efficiency in the clinic and improve patient care.

- More than 25 clinical waveforms
- 2 independent Electrotherapy channels
- sEMG and sEMG + electrical stimulation standard
- High resolution colour display of all screens
- Over 200 clinical protocols
- Over 100 user-defined protocol slots
- Over 10 quick-link indications for quick parameter retrieval
- Impressive clinical library which includes full colour graphic anatomical and pathological libraries on vibrant LCD screen
- Documentation of treatment outcomes with patient data cards
- Sequencing to direct a designated therapeutic course without having to modify the unit
- 1 and 3Mhz ultrasound frequencies
- Pulsed and continuous modes (10%, 20%, 50% and 100%)
- Variable duty cycles (16Hz, 48Hz and 100 Hz)
- BNR 5:1 maximum
- Ergonomically designed sound heads in 1cm^2, 2cm^2, 5cm^2 and 10cm^2
- 3 year warranty (accessories 1 year)

VEINOPLUS SPORT®

Created in 2004 by Paris-based Ad Rem Technology, VEINOPLUS® device family has opened new horizons for the use of electro-stimulation in MEDICAL, SPORTS and WELL-BEING fields thanks to its innovative "Second Heart" technology. After 3 years of R & D and in co-operation with the top athletes, Ad Rem Technology launched for London Olympic Games a decisive innovation in sport recovery: VEINOPLUS® SPORT.

3 Effects
• Accelerated lactate clearance
• Local analgesic effect
• Relaxing action

2 Recoveries
• Whole body recovery: activates the Second Heart® (ie the calf-pump)
• Local recovery: relieves pain, prevents cramps and muscle soreness

1 Program
• Signal optimized for sport recovery
• Takes only a few minutes to be efficient

VEINOPLUS® SPORT

16000	Veinoplus Device Electrodes	Each
16005	Veinoplus Sport Power Cuffs	Pair

VEINOPLUS BACK®

The Veinoplus Back offers a unique program of pain relief and a relaxing massage which acts on the three main areas of the back. Compact and easy to use, you can take it anywhere. The signals of stimulation are a combination of TENS and NMES. TENS (Transcutaneous Electrical Nerve Stimulation) is widely recognised to alleviate pain whereas NMES (Neuro-muscular Electrical Stimulation) stimulates the muscles to cause their contractions and inturn relieve (relax) muscle spasms. Veinoplus® Back combines 4 effects providing back pain relief in one single stimulation program.

- Soothes back pain
- Delivers a relaxing massage
- Relieves muscle spasms
- Release natural endorphins to relieve general pain

equipment

MEDUMAT EASY

Ventilator with voice prompts
MEDUMAT Easy is extremely safe and easy to use. Trained first aid staff and First Responders quickly understand how to use the ventilator and can concentrate completely on the patient. Spoken instructions support the rescue worker at every step. The demand-flow mode in oxygen inhalation manages the delivery of oxygen and adjusts to the needs of the patient.

User-friendly
- Safe and easy to use
- Clear and concise voice prompts lead to safe ventilation
- User guidance available in several different languages
- Acoustic alarms and visual error messages
- Display for ventilation monitoring

Ergonomic
- Small and light
- EN-1789-conformance for wall-mounted holder and carrying platforms can be stowed on Weinmann carrying platforms and in Weinmann emergency backpacks

Energy supply / Oxygen usage
- Maintenance-free lithium batteries with a service life of at least two years (no charging required)
- No internal usage of oxygen
- Optimised oxygen usage with demand-flow mode: The patient receives oxygen during inspiration; no oxygen loss during exhalation as caused by continuous flow
- Ventilation or inhalation
- Controlled ventilation (IPPV) can be set by simply turning the rotary dial (time-cycled, volume-constant)
- PEEP valve can be connected

MEDUMAT EASY CPR

Voice-guided ventilator optimized for Cardiopulmonary Resuscitation

MEDUMAT Easy CPR is extremely safe and easy to use. The voice-guided device assists trained First Responders and Emergency Medical Technicians with emergency ventilation and Cardiopulmonary Resuscitation (CPR). When you are carrying out life-saving measures, MEDUMAT Easy CPR operating in CPR mode supplies you with unmistakable spoken instructions and gives you the right timing of chest compressions with the help of its metronome. The ventilator also lets you manually generate a ventilated breath by activating MEDUtrigger on the mask. With the timing of the ventilated breath under your control, MEDUMAT Easy CPR can be integrated perfectly in the CPR process.

Top features of MEDUMAT Easy CPR:

- Voice prompts and metronome function for support of Cardiopulmonary Resuscitation
- Spoken instructions help with detection and resolution of problems
- Simple and safe selection of settings for controlled ventilation:
- Visual and acoustic alarms (LED, alarm signals and voice prompts)
- Illuminated ventilation pressure display is ideal for use in the dark
- Small and light and therefore suitable for use at scene of emergency

MEDUMAT STANDARD 2

A clear new perspective

Every second counts in an emergency. Especially when the patient needs respiratory support, a quick reaction can save lives. A completely new look at state-of-the-art ventilation comes with MEDUMAT Standard², the advanced development of MEDUMAT Standard and MEDUMAT Standarda. Its most striking feature is a monitor with a large color display. All critical respiratory parameters are quickly and clearly shown on the screen. Highly organized operating elements and symbols and effective acoustic and visual alarms ensure the highest level of safety.

More functions for Emergency Medical Technicians

Compared to previous models, MEDUMAT Standard² has many more functions. Access to ventilation, for example, is gained by entering the patient's height. Modes include IPPV, CPR (for Cardiopulmonary Resuscitation), RSI (Rapid Sequence Intubation for support with induction of anesthesia, and CPAP (for non-invasive therapy).

MEDUMAT STANDARD A VENTILATOR

The Ventilation Standard A for Professionals

MEDUMAT Standard A offers you everything you need for reliable emergency ventilation. Users around the world are impressed by its especially simple operation and ruggedness. With controlled ventilation and assisted ventilation, we provide you with the ventilation options you require in an emergency. Our diverse modules let you add many supplemental functions, such as CPAP therapy, to MEDUMAT ventilators. When there's not a second to lose, the well-designed operating panel with special symbols and colors help you to quickly set the right ventilation parameters. When placed on our portable LIFE-BASE system, the MEDUMAT Standard A has practically unlimited mobility.

An advantage MEDUMAT Standard A has over manual ventilation is the option of setting constant values for tidal volume, ventilation frequency and minute volume. These settings help to prevent ventilator-induced injuries*. Furthermore, with a ventilator you can reliably prevent hyperventilation and damaging pressure peaks*. That reduces the intrathoracic pressure, which in turn improves venous reflow and cardiac output*. You can keep your hands free to provide additional care to the patient. If a problem arises,

WM28400

WM28300

WM MEDUMAT TRANSPORT

MEDUMAT Transport provides primary and secondary care for emergency and intensive-care transport patients. The adjustable ventilation parameters guarantee sufficient ventilation, specifically adapted to each patient.

For the best possible ventilation, the user can select from among five pressure-regulated and three volume regulated ventilation modes on MEDUMAT Transport. A sensitive trigger and a flow adjustment increase patient comfort in controlled and assisted ventilation modes. The device makes it possible for the user to continue the clinical therapy which was initiated during transport.

Further support is supplied by ventilation monitoring, which, in keeping with our philosophy, must always be a component of the ventilator.

In addition to the expiratory volume measurement available in MEDUMAT Transport, the device may also be optionally equipped with an integrated capnograph ETCO2 measurement.

The MEDUMAT Transport functions and qualities include clarity, simple and convenient operation and intuitive user guidance. All of these things guarantee a device that delivers top-level results with maximum reliability. With the information on the following pages you'll be able to form your own opinion of the innovative functions and exceptional capabilities of MEDUMAT Transport.

MEDUMAT Transport is available on the emergency carrying platform LIFE-BASE 4 NG.

MEDUCORE EASY (AED)

The MEDUCORE Defibrillator is small, compact and offers the most extensive monitoring treatment features available on the market.Every Second Counts: Without early defibrillation the chances of survival shrinks by 10% per minute.

Key Features

- Traffic light principle - stop/go
- 2 year warranty
- 5 year battery life
- Device will self test daily
- Automatic voice control - increases and decreases with the noise level in the room
- 30 month electrode shelf life
- Can be used from 20kgs of bodyweight on the standard electrodes without necessity of special paediatric electrodes
- Info-key calls up elapsed time and number of shocks since start
- Metronome function ensures correct chest compressions rate and ideal ratio of compression to ventilation
- Training devices are available
- Comes with scissors, mouth guard and razor
- Wall and vehicle mounts available
- Carry bag available
- Made in Germany
- Service for Meducore Easy can be carried out in Auckland, Taranaki and Christchurch

CODE	DESCRIPTION

MEDUCORE STANDARD

Defibrillation, Monitoring and Ventilation MEDUCORE Standard is your strong partner for resuscitation.

The defibrillator supports paramedics with automatic analysis of cardiac rhythm, understandable voice prompts and a metronome for chest compressions so you can keep an eye on everything.

The perfect partner for everyday demands in emergency Medical care

The charging is done while MEDUCORE Standard is analysing the heart rhythm. The simultaneous operations reduce hands-off patient time to a minimum.

Trained users can choose to trigger defibrillation manually and do without the automatic heart rhythm analysis. The simple menu navigation and the professional alarm system ensure reliable monitoring and patient care. The long rechargeable battery life and the compact and rugged construction of MEDUCORE Standard also contribute to providing the best possible emergency medical care.

The large color display of ECG and other important parameters of heart rate, pulse and oxygenation keep the user informed at all times. All these features and functions make MEDUCORE Standard the perfect partner in the care of emergency patients under the toughest conditions

WM 45005	MEDUCORE Standard Basic
WM 45000	MEDUCORE Standard Advanced
WM 45200	MEDUCORE Standard Professional

CORPULS 1
Small, handy and multifunctional

The new corpuls1 is a life-saving defibrillator/patient monitor that has been specifically developed to meet the requirements of fire fighters, first responders, patient transports and emergency management. The intuitive and easy operation of the corpuls1 allows immediate and comprehensive monitoring and therapy of the patient.

The functional protective bags for accessories as well as the brackets guarantee the safe and ergonomic transport of the corpuls1 to the emergency site.

- Compact and weighing only 2.2 kg
- Large 5.7" screen for ergonomic display of curves and parameters
- 6-lead ECG for optimised monitoring of the patient
- Non-invasive SpCO-, SpMetand SpHb measurement with Masimo® RainbowTM SET
- Pre-connected electrodes for immediate use
- Compatible with corpuls3

FOR MORE INFORMATION CONTACT:
USL MEDICAL CUSTOMER SERVICES ON 0800 658 814

CORPULS 3

Patient Monitoring and defibrillator

The corpuls3 offers an entirely new and revolutionary design concept compared with traditional compact defibrillator/monitoring devices. It is designed as a complete modular system and can be split into:
- Monitoring unit
- Patient box
- Defibrillator/Pacer unit

Monitoring unit

The detachable Monitoring unit guarantees easy handling and provides a sophisticated solution at all times.
- Jog-dial, softkeys and function keys for intuitive, fast and immediate access and operation
- Large colour display (8,4") with individually configurable display views and 12 lead diagnostic ECG preview
- Integrated LAN or GSM for data transmission with corpuls.web

Patient box

The Patient box is the "heart" of the system and enables uninterruptible monitoring from the EMS site into the hospital.
- The immediate feedback on depth and rate of Thorax compressions of corPatch CPR ensures high quality CPR and improves the outcome of patients
- Simultaneous 12 lead diagnostic ECG with optional measuring and interpretation software
- Innovative Masimo® Rainbow® SET technology for measurement of SpO2, SpCO, SpMet, SpHb, PI and PP

Defibrillator/Pacer unit

Greater mobility and flexibility due to weight reduction if the defibrillator is not needed.
- Enhanced therapy options with smartMetronome during CPR
- Pacing: fix, demand and overdrive pacing with ramp-down mode
- corPatch therapy master cable enables usage either with shock paddles, corPatch therapy electrodes or shock spoons

CORPULS CAN COME WITH MULTIPLE CONFIGURATIONS THE FOLLOWING ARE SOME OF THE OPTIONS:

- **PACER**
- **AED - AND MANUAL MODE**
- **CORPATCH CPR**
- **12 LEAD ECG**
- **SPO2**
- **NIBP**
- **CO2**
- **IBP**
- **TEMP**
- **PRINTER**

equipment

MANUVAC

Manual Suction Pump

The manual suction pump MANUVAC has been proven in emergency use. MANUVAC is rugged, stable, maintenance-free and simple to operate by hand, foot or knee.

CODE	DESCRIPTION
12726	Manuvac

SUCTION EASY DISPOSAL SUCTION

Suction Easy is an Oral Suction Device used to effectively clear the oral pharynx, without question, one of the most critical of basic rescue skills. The suction Easy is a convenient easy and efficient suction device. The Suction Easy is stored in the zip lock bag which doubles as a bio-hazard bag with the removal of label, enabling easy disposal after use. Fluid capacity is greater than 1000 cc with a vacuum force of 100 mm Hg. It will perform the job required on all patients quickly and effectively while being very affordable.

CODE	DESCRIPTION
12731	Suction Easy Disposable Unit

ACCUVAC BASIC

Electric Suction Pump

ACCUVAC Basic can be adjusted for any suction situation, thanks to variable subpressure regulation. Besides the robust casing, the handy grip, the stable base and the frontal, integrated hose clip, ACCUVAC Basic also is equipped with an energy display for the rechargeable battery.

CODE	DESCRIPTION

equipment

COMBI BAG

Thanks to the unique technology of COMBIBAG, the 2-in-1 resuscitator for adults and children, you always have the right equipment on hand. With a simple 180-degree turn of the COMBIBAG, you vary the volumes quickly and automatically adapt the tidal volume to the patient.

The safety valve limits the ventilation pressure and protects the patient during ventilation with a mask or tube. With COMBIBAG you save time, free up space in your emergency case and save on costs.

| CODE	DESCRIPTION
WM11020	Combi Bag Adult/Child

SILICONE RESUSCITATOR

See for yourself how easy it is to use our sturdy silicone resuscitators. They are very easy to clean, disinfect or sterilize. The transparent single-layer silicone bag is available in three sizes – for premature infants and babies up to 20 kg, small children up to 30 kg and adults from 30 kg. Standard delivery includes reservoir bag and corresponding masks. The Weinmnann oxygen conservation system OXYMAND demand valve can be connected to the resuscitator with the adapter.

SOMNO CHECK MICRO

For simplified sleep screening at home

SOMNOcheck micro provides reliable sleep screening in a small device that is easy to use and comfortable to wear. The innovative Pulse Wave Analysis (PWA) delivers high-quality differentiated findings. Immediately after the recording has been completed, SOMNOcheck micro shows you the findings in the display. There's no need for a PC or data transmission. The easily understood RAG (Red,Amber, Green) risk assessment in the display is followed by detailed results of the sleep analysis.

Noteworthy features of SOMNOcheck micro:
- Simple and fast identification of patients with an increased risk of Sleep-Disordered Breathing (SDB)
- Differentiated findings for referral to medical specialists
- First small diagnostic device worn on wrist to recognize central apnea / hypopnea
- Findings of SDB based on arousals and RERAs
- Reliable analysis: sensitivity 96.2 %, Specificity 91.7 %1)
- Simple Red-Amber-Green function for quick interpretation
- One-key operation: easy access to detailed results
- Reliability assured by automatic analysis of measurements
- Quick and simple documentation on report sheet

SOMNO LAB 2

Superior sleep diagnosis that's mobile, safe and simple

- R&K upgrade set (WM 95235)
- SOMNOlab 2 basic device (WM 95410)
- Data transfer and charging cable (WM 95116)

CPAP 20E - CPAP

Basic therapy for sound sleep

Weinmann's best-priced CPAP 20e guarantees effective CPAP therapy – and thus healthy sleep. User-friendliness and economy are the watchwords for the simple and efficient operating functions.

Features:
- Simple, proven three-button operation
- Trouble-free cleaning
- Quiet, < 30 db(A)
- Light, only 1.25 kg
- Pressure constancy
- Use of standard tube
- Analysis of compliance data with PC software SOMNOsupport
- Date-related compliance data with or without humidifier for 365 days
- Remote setting with SOMNOadjust or SOMNOsupport

Functions
- Softstart function (5 to 30 minutes)
- Two-level filter system
- Safe oxygen feed
- Automatic altitude adjustment
- External power pack can be used worldwide with 100 – 240 V
- DC adapter for 12 V or 24 V available as accessory

Available option – Humidifier CLICK 2
- Attaches to therapy device with a simple "click", holds 280 ml of water, six-level setting on therapy device, easy to clean

SOMNO COMFORT 2E - CPAP

CPAP therapy: Your sleep in top form

SOMNOcomfort 2e is the enhancement of the exceptionally successful SOMNOcomfort device which set the standard for CPAP therapy. The SOMNOcomfort 2e is small, light, extraordinarily quiet and very simple to use, even more so with the new integrated heated humidifier.

An unbeatable duo in top form for greater compliance.

The heated humidifier SOMNOaqua is ideal in many ways for patients who suffer from dried out nasal mucosa.

SOMNOaqua can be inserted easily into the device housing and just as easily removed for cleaning.

Features:
- Pressure constancy for high quality CPAP therapy
- New space-saving device design
- Optional integrated heated humidifier
- Power supply from 100 to 240 V for worldwide use
- Optional DC adapter for mobile use can be connected to 12 V or 24 V
- Patient-friendly three-key operation, including a raised on/off key
- Click adapter for standard hose
- Trouble-free cleaning
- Read-out of compliance data with PC software SOMNOsupport
- Remote settings with SOMNOadjust
- Supplied with trolley-suitable bag

CODE	DESCRIPTION
WM27320	Cpap 20E

CODE	DESCRIPTION
WM29860	Somno Comfort 2E

SOMNO BALANCE E - APAP

Balanced treatment of obstructive sleep apnea

The new auto-CPAP therapy device offers balanced treatment of obstructive sleep apnea. Dependable distinction is made between obstructive and central apnea by the new OPP (Obstructive Pressure Peak) technology. SOMNObalance e is small, light and extremely quiet. The therapy device makes operation very easy and cleaning procedures – thanks to the integrated humidifier SOMNOaqua – absolutely trouble-free.

Features:
• Quiet with good pressure stability
• CPAP and APAP modes available with pressure relief option softPAP
• OPP (Obstructive Pressure Peak) technology to distinguish central from obstructive apnea
• Epoch-based and need-oriented pressure adjustment
• Patient-oriented Info menu in display – therapy success is visualized with RDI (Respiratory Disturbance Index), leakage and 90% percentile
• Extensive statistical data for therapy monitoring (including CPAP) analysis with PC software SOMNOsupport
• Can be used around the world with power pack for 100 to 240 V
• Battery operation (cars: 12 V or trucks: 24 V) possible with optional DC adapter, even with simultaneous operation of SOMNOaqua humidifier
• Suitable for use with full-face masks like JOYCE Full Face

PRISMA 20A - APAP

Therapy flexibility for treatment of Obstructive Sleep Apnea (OSA)

With assistance from Forced Oscillation Technique (FOT), prisma20A reliably distinguishes between obstructive and central apnea. In response to events, the APAP therapy device automatically and continuously adjusts pressure exactly to the needs of your patients. Because the CPAP and APAP modes can be combined with the gentle pressure relief softPAP, prisma20A offers a high degree of therapy flexibility and comfort.

Major features of prisma20A:
• Reliable technology (FOT) distinguishes obstructive sleep apnea from central sleep apnea
• With pressure relief softPAP
• High resolution therapy data for 14 days and detailed statistics for 365 days
• Improved compliance, thanks to comfort functions such as softSTART, autoSTART-STOP and therapy feedback
• Integrated tube heating prevents condensation in tube and mask

The humidifier prismaAQUA is used with a therapy device to treat patients who complain of dry upper airways or cold respiratory air.

equipment

PRISMA 25S - BILEVEL

BiLevel-S therapy with high/fluctuating pressure needs and CPAP intolerance

Our prisma25S is the device of choice for patients with obstructive, mixed or complex sleep apnea who have high and/or fluctuating pressure needs and show poor CPAP compliance. It offers safe and effective therapy, thanks to adaptive pressure regulation across a broad pressure range, apnea differentiation by means of FOT and process-supporting features. All of that and more – no louder than a soft whisper.

Major features of prisma25S:
- Broad pressure range (4 - 25 hPa) and numerous parameters for greater flexibility with therapy settings
- Safe technology (FOT) distinguishes obstructive from central apnea
- High resolution therapy data for up to 14 days and detailed statistics for 366 days
- Very quiet even at high pressures
- Integrated tube heating prevents condensation in tube and mask

PRISMA 25ST - BILEVEL

BiLevel-ST therapy with innovative setting concept (SCOPES)

You'll receive a therapeutic solution tailored to your personal needs with prisma25ST. Designed for patients with obstructive, mixed or complex sleep apnea with comorbidities, this BiLevel-ST device offers maximum flexibility with settings and indication-specific pre-settings (SCOPES). Furthermore, the automatic backup frequency, apnea differentiation with FOT and many comfort functions ensure safe, effective and whisper-quiet therapy.

Major features of prisma25ST:
- Broad pressure range (4 - 25 hPa) and numerous parameters for greater flexibility with therapy settings
- SCOPES (indication-specific pre-settings) for quick therapeutic success
- Extra safety provided by automatic backup frequency, which can be set to a fixed high rate
- Safe technology (FOT) distinguishes obstructive from central apnea
- Very quiet even at high pressures
- Integrated tube heating prevents condensation in tube and maskfunctions ensure safe, effective and whisper-quiet therapy

The humidifier prismaAQUA is used with a therapy device to treat patients who complain of dry upper airways or cold respiratory air.

PRISMA CR - BILEVEL

The sleep medicine solution for complex Sleep-Disordered Breathing

With prismaCR and its newly validated algorithm, you can reliably treat and provide quick relief to your patients with periodic breathing, e.g., Cheyne-Stokes respiration, and central, mixed or complex breathing disorders. Using intra-breath regulation combined with a backup frequency based on target volume, prismaCR provides pressure support as needed during the patient's current breath.

Major features of prismaCR:
- Validated anticyclic servoventilation (AcSV) with smart adjustment of pressure support within a single breath
- High resolution therapy data for 14 days and detailed statistics for 365 days
- Improved compliance, thanks to comfort functions such as softSTART, autoSTART-STOP and therapy feedback
- Integrated tube heating prevents condensation in tube and mask

PRISMA LAB

The comfortable titration device for all patients

All the modes of the prismaLINE are available to you for titration with prismaLAB. From the computer you can make all mode and pressure changes in prismaLAB to ensure gentle treatment of your patients.

Major features of prismaLAB:
- Equipped with all the modes of the prismaLINE, from CPAP to optimized AcSV (anticyclic servoventilation)
- Uninterrupted therapy and gentle pressure transition when modes change during the night
- High resolution therapy data for 14 days and detailed statistics for 365 days
- Improved compliance, thanks to comfort functions such as softSTART, autoSTART-STOP and therapy feedback
- Integrated tube heating prevents condensation in tube and mask

The humidifier prismaAQUA is used with a therapy device to treat patients who complain of dry upper airways or cold respiratory air.

VENTIMOTION 2

Noticeably more comfort and stability in non-invasive (NIV) ventilation
You are assured higher quality and more comfort in non-invasive pressure-controlled ventilation by VENTImotion 2. The innovative pressure relief, AirTrap Control, counteracts dynamic hyperinflation. Combined with the trigger lockout function, it makes ventilation easier, especially for COPD patients. VENTImotion 2 also has adjustable volume compensation. With its variable speed settings for the automatic regulation to the target volume, the ventilator ensures optimum safety and stability of tidal volume.

Noteworthy features of VENTImotion 2:

Therapy comfort
- Greater therapy comfort and better ventilation quality, particularly for COPD patients
- AirTrap Control: pressure relief to prevent dynamic hyperinflation
- Trigger lockout: effective protection from false triggering and trigger artefacts
- Variable speeds for pressure rise and pressure fall
- Operating convenience
- Intuitive navigation with rotary push button and direct access to main ventilation parameters
- Numeric and graphic display of ventilation parameters
- Softstart and Autostart
- Compatible with accessories in VENTI line

Safety
- Volume compensation: optimum safety and stability of tidal volume
- Visual and acoustic alarms
- Optional backup power with external rechargeable battery VENTIpower for up to seven hours of operation
- High flow of up to 300 l/min. for high pressure constancy and leakage compensation
- Hygiene concept for reconditioning at change of patient

CODE	DESCRIPTION
WM27830	Ventimotion 2

VENTILOGIC PLUS

New options for invasive (IV) and non-invasive (NIV) ventilation

No other device in this segment combines therapy efficiency and therapy comfort as effectively and economically as VENTIlogic plus. A slightly leaner version of its "big brother" VENTIlogic LS, VENTIlogic plus is a lower-priced and very efficient therapy device for ventilation treatment at home.

Noteworthy features of VENTIlogic plus:

Therapy comfort
- LIAM (Lung Insufflation Assist Maneuver) cough support
- TA mode (TA = Timed Adaptive): respiratory effort is reduced by the optimized synchronization of device and patient's breathing pattern
- Trigger lockout: more effective protection from false triggering and trigger artefacts
- Volume compensation: ideal adjustment of therapy pressure to patient needs

Operating convenience
- Intuitive navigation with push-button dial and direct access to main ventilation parameters
- Numeric and graphic display of pressure, flow and volume
- Compatible with accessories in the VENTI line

Safety
- Visual and acoustic alarms
- As dependable as VENTIlogic LS, because VENTIlogic plus also has an integrated rechargeable battery
- Optional backup power supply in external rechargeable battery VENTIpower for up to seven hours of operation
- High flow of up to 300 l/min. for pressure constancy and leakage compensation
- Hygiene concept for reconditioning at change of patient

CODE	DESCRIPTION
WM27980	Ventilogic Plus

VENTI LOGIC LS

The solution for life-support invasive (IV) and non-invasive (NIV) ventilation

VENTIlogic LS ensures complete care of your patients with its combination of NIV and IV options from intermittent ventilation to uninterrupted life-sustaining ventilation. You can use all hose systems – single and double patient circuits with patient valve and leakage hoses – with VENTIlogic LS to cover nearly all indications for invasive ventilation.

Because VENTIlogic LS has all the parameters available in the VENTI line, you can use the therapy device as a titration platform and transfer the parameter settings to all Weinmann ventilators.

VENTIlogic LS features simple and convenient operation and intuitive user navigation. Thanks to the same operating concept and nearly the same design of all VENTI devices, such as VENTIlogic plus, VENTIlogic, VENTImotion 2 and VENTImotion, the entire range of accessories in the Weinmann ventilation product line can also be used for VENTIlogic LS.

Noteworthy features of VENTIlogic LS:

Therapy comfort
- LIAM (Lung Insufflation Assist Maneuver) cough support
- TA mode (TA = Timed Adaptive): reduction in Work of Breathing by ideally synchronizing the device with patient's breathing pattern

- Trigger lockout for effective protection from false triggering and trigger artefacts volume compensation adjustment for optimum match of therapy pressure to patient needs very quiet even at maximum pressure: at 10 hPa, about 28 dB(A)

Operating convenience
- intuitive navigation with push-button dial and direct access to main ventilation parameters
- numeric and graphic presentation of pressure, flow and volume
- storage of emitted alarms for analysis of therapy and device settings
- PC software (WEINMANNsupport) for setting of patient data (WEINMANNadjust) and therapy analysis. Ventilation parameters can be displayed in any conventional PSG system with use of the optional Analogbox D/A.
- compatible with accessories in VENTI line

Safety
- Visual and acoustic alarms
- Internal rechargeable battery supplies power in the event of loss of electrical power
- Optional backup power supply with external rechargeable battery VENTIpower for up to seven hours of operation
- High flow of up to 300 liters/minute. Ensures high pressure constancy and leakage compensation
- Hygiene concept for reconditioning at change of patient

JOYCEONE - NASAL

Nasal mask for sleep therapy and ventilation that fits nearly every patient

JOYCEone is the nasal mask that always fits. It all happens automatically as the optimized mask cushion finds the ideal position on its own, regardless of the shape and size of the patient's nose. Likewise, the springs on the forehead support automatically maintain the right distance to the forehead for effective and comfortable therapy. JOYCEone also boasts easy handling with color-coded headgear and clips that simplify mask assembly. Taken together, these features help you to save time with fitting and explaining the mask to your patients. The nasal mask JOYCEone is certain to give your patients a good feeling. JOYCEone is also available as a full face mask.

Major features of JOYCEone:
*   Time-saving perfect fit: automatic adjustment of mask cushion and forehead support
*   Economical: one size fits all patients
*   Fool-proof assembly, thanks to color coding of headgear straps and clips
*   WEINMANN SilkTec coating increases wearing comfort

JOYCEONE FULL FACE - MASK

Full face mask for sleep therapy and ventilation that fits virtually every patient

JOYCEone Full Face is the full face mask that always fits. The optimized mask cushion automatically finds the ideal position on its own, regardless of the shape and size of the patient's nose. Likewise, the springs on the forehead support automatically maintain the right distance to the forehead for effective and comfortable therapy. JOYCEone Full Face is easy to handle as it is equipped with color-coded headgear and clips that simplify mask assembly. All together, these features help you to save time with fitting and explaining the mask to your patients. The JOYCEone Full Face is certain to give your patients a good feeling. JOYCEone is also available as a nasal mask.

Major features of JOYCEone Full Face:
*   The world's first one-size-fits-all full face mask
*   Time-saving perfect fit: automatic adjustment of mask cushion and forehead support
*   Economical: one size fits all patients
*   Fool-proof assembly, thanks to color coding of headgear straps and clips
*   WEINMANN SilkTec coating increases wearing comfort

JOYCEEASY - NASAL

Easy-to-use nasal mask for sleep therapy and ventilation

It really could not be easier. Everything about our ventilation mask JOYCEeasy is aimed at easy operation, from the simple mask adjustment directly on the patient to the intuitive handling of the stable nasal mask. Because the improved fit of JOYCEeasy reduces leaking and pressure points to a minimum, patients immediately improve compliance with therapy. JOYCEeasy is also available as a full face mask.

Major features of JOYCEeasy:
• Simple, intuitive handling
• Optimized fit improves therapy compliance
• Even easier size adjustment
• Tube-anchoring strap keeps tube securely in place
• Extremely robust
• WEINMANN SilkTec coating increases wearing comfort

JOYCEEASY FULL FACE - MASK

Easy-to-use full face mask for sleep therapy and ventilation

It really could not be easier. Everything about our ventilation mask JOYCEeasy Full Face is designed for easy operation, from the simple mask adjustment directly on the patient to the intuitive handling of the stable full face mask. The improved fit of JOYCEeasy Full Face reduces leaking and pressure points to a minimum and thus improves patients' therapy compliance. JOYCEeasy is also available as a nasal mask.

Major features of JOYCEeasy Full Face:
• Simple, intuitive handling
• Optimized fit improves therapy compliance
• Even easier size adjustment
• Tube-anchoring strap keeps tube securely in place
• Extremely robust
• WEINMANN SilkTec coating increases wearing comfort
• Quick-release cord to detach mask

JOYCE NASAL

JOYCE can be assembled specially for each sleep apnea or home mechanical ventilation patient. JOYCE is available in four mask models in four sizes each with two mask seals of different strengths. All these standard masks are available as vented and non-vented variations.

Major features of JOYCE Nasal:
- Proven ball-and-socket joint
- A choice of two mask seals: for low and medium therapy pressure up to 30 hPa; for high therapy pressure of up to 40 hPa
- Optional integrated exhalation system
- Four standard models in four sizes (S, M, L and new: XL) each, packed ready to use
- Mask seal is simply pressed into place with palm of hand
- Extra-small shape
- Extremely quiet
- Anatomically molded, skin-friendly mask seal
- Breathable headgear with practical clip hooks
- Adjustable forehead support, wide cushion
- Stopper for pressure measurement connection

JOYCE FULL FACE MASK

Anatomical fit, convenient handling and a clever concept are all combined in JOYCE Full Face, the mask for sleep apnea and home mechanical ventilation patients. Compared to other full face masks, the small and light JOYCE Full Face guarantees greater wearing comfort. Its modular design principle is also suitable for our nasal mask JOYCE. That helps to optimize inventory management. Fitting the mask to the patient is especially easy and practical with JOYCE Full Face. Simply remove the elbow piece and look into the mask to check the fit.

Major features of JOYCE Full Face:
- Proven ball-and-socket joint
- Anatomical fit for greater wearing comfort
- Easy to fit to patient
- Very quiet
- Lightweight
- Convenient handling (e.g. easily attached to mask seal)

JOYCE SILKGEL

Gel nasal mask with enhanced wearing comfort for sleep therapy and ventilation

The high degree of wearing comfort puts the custom-assembled JOYCE SilkGel mask ahead of the rest. Its gel-filled mask cushion and forehead cushion are coated with the silky smooth WEINMANN SilkTec. The headgear with optimized cut perfectly rounds off the thoroughly comfortable mask. JOYCE SilkGel is also available as a full face mask.

Major features of JOYCE SilkGel:
- Easy to adjust, perfect fit
- WEINMANN SilkTec coating increases wearing comfort
- Simple cleaning because nothing adheres to the smooth surface
- Pressure range from 4 to 40 mbar
- Many replacement parts available
- Ball-and-socket joint provides freedom of movement and a secure fit

JOYCE FULL FACE PLUS

The full face mask with the plus in extra chin stability

Secure fit together with greater wearing comfort –those are the features that distinguish JOYCE Full Face, the tried and tested mask for every sleep apnea and home ventilation patient, from the rest. In this model JOYCE Full Face+ works with a two-chamber principle. The first chamber is for the mouth and nose and the second holds the chin as needed. More security results in optimum therapy.

The two-chamber principle:
- The fi chamber covers the nose and mouth as does JOYCE Full Face. Consequently we create – as before minimum dead space.
- The second chamber holds the chin without generating without an unpleasant flow of air across the chin. The lower part of the seal does not lie directly on the chin. If the chin should fall, it will be caught. Air holes prevent sweating.

VISIONAIRE OXYGEN CONCENTRATOR

VisionAire™ Oxygen Concentrator with the lowest maintenance costs

Economical and low maintenance are the hallmarks of VisionAireTM. Our new oxygen concentrator is a combination of lightweight, compact construction and unique nearly maintenance-free technology. Its intuitive operation and easy transport make VisionAireTM the perfect therapy partner. This concentrator can provide reliable care in keeping with patients' needs throughout the course of the disease.

Major benefits from VisionAire™:

• Nearly maintenance-free, thanks to highly developed technology
• Lightweight at only 13.6 kg
• Small, only 52.8 cm high
• 5-year warranty
• Low power consumption, only 290 watt

BONSAI OXYGEN CONSERVER

The Bonsai® is not only the lightest oxygen conserver on the market, it also offers the highest oxygen conservation ratio available! Learn how the Bonsai® can help you save time and money, meet the clinical needs of your patients, and ensure continued customer satisfaction.

OXYWAY

Oxygen Pressure Reducer and Flow Regulator

Only a precise dosage of oxygen can achieve the desired effect on your ventilation patients. Our pressure reducers and flow regulators dependably provide extremely precise regulation. OXYWAY Fix, OXYWAY Fine, OXYWAY Fast and OXYWAY Click can be used in many different ways in oxygen and emergency medicine. The ultrasound-tested high-pressure housing and double sinter filter ensure operating safety.

OXYWAY pressure reducers and flow regulators, which we offer in many variants, are available with up to two oxygen outlets – flow and pressure outlets. The flow outlet is for the direct supply of oxygen to the patient while the pressure outlet is for supplying oxygen to the ventilator or oxygen administrator.

Accessories for the OXYWAY pressure reducers and flow regulators include oxygen cylinders and cylinder brackets, oxygen outlets, pressure hoses, administrators, nasal cannula and inhalation masks. With the full range of equipment you ensure a dependable supply of oxygen for use on the road, for extended treatment on the scene or over long transport routes.

Overview of OXYWAY pressure reducers
OXYWAY pressure reducers come in four basic models:

OXYWAY Fast 1
For gradually adjustable doses of oxygen flow in levels 1, 2, 3, 4, 5, 6, 9, 12, 15 liters/minute

OXYWAY Fast 11
For gradually adjustable doses of oxygen flow in levels 0.5, 1, 1.5, 2, 2.5, 3, 4, 5, 6 liters/minute

OXYWAY Fix
For permanently set oxygen flow of 4 liters/minute or of 190 liters/minute for MEDUMAT ventilators.

OXYWAY Fine
For infinitely adjustable oxygen flow of 3 - 15 liters/minute with content and flow meter.

OXYWAY Click
for flow dosage via central gas systems used by rescue services and hospitals.

Each basic device has additional models for special uses. Country-specific connectors are also available upon request.

PROUDLY NZ OWNED

USL has been built by creating seamless relationships. Since 1984 we've built enduring partnerships with customers, suppliers and our community. We set out to create the very best environment for our team so that they might deliver their unique skills to our markets.

WHAT YOU CAN EXPECT FROM US:

- We offer our customers dependability and experience they can rely on and trust.
- We deliver under IFOTIS: In-Full, On-Time, In-Specification.
- We operate a management reporting system that provides information on the frequency, recency, amount and type of purchases for all customers, and thereby enhancing their business purchasing efficiency.
- Normal guarantees apply and are rigorously honoured, and we guarantee to supply our key clients with critical stock items under IFOTIS.
- Our product range is comprehensive. It meets our Healthcare customers' needs, so they can confidently have a one supplier relationship for all medical products.

OUR COMPANY AT A GLANCE:

- USL is a limited liability company, proudly New Zealand owned
- Our annual sales exceed $NZ 60 Million
- Our head office and main distribution centre are based in Auckland
- The South Island is serviced from our Christchurch distribution centre
- We service 3,750 customers at all locations throughout New Zealand including all 20 of the National District Health Board

- Private Market
- General Practitioners
- Nurse Practitioners
- Private Hospitals (Medical, Surgical)
- Rest Homes
- Accident and Emergency Clinics
